**German Thought and Culture in England, 1700-1770** Garold N. Davis, 1969      **The Victorians and Germany** John R. Davis, 2007

Of all the parts of the world to interest the Victorians Germany was among the most important. Though less well known today partly in consequence of the events of the twentieth century German influences in Britain were strong and their legacy substantial. This book charts the emergence, development and course of the Victorian interest in Germany. Its multidisciplinary approach which binds together for the first time the latest research conducted in a variety of areas shows how a discourse developed in Britain regarding Germany and the Germans which spilled over from one area of life to another and included some of the most prominent figures in Victorian life. It provides a framework for understanding the causes of the Victorian fascination with Germany and argues forcefully that the roots of this lay in the processes of modernisation taking place in each place respectively. It also points to the deep impact this had upon the course of British history and reveals how it prepared the ground for the future direction of Anglo German relations.

*German Thought and Culture in England, 1700-1770* Garold N. Davis, 1969-05-01      *Music, Nature and Divine Knowledge in England, 1650-1750* Tom Dixon, 2023

During a period of tumultuous change in English political, religious and cultural life, music signified the unspeakable presence of the divine in the world for many. What was the role of music in the early modern subject's sensory experience of divinity? While the English intellectuals Peter Sterry 1613-72, Richard Roach 1662-1730, William Stukeley 1687-1765 and David Hartley 1705-57 have not been remembered for their musicking, this book explores how the musical reflections of these individuals expressed alternative and often uncustomary conceptions of God, the world and the human psyche. Music is always potentially present in their discourse, emerging as a crucial form of mediation between states: exoteric and esoteric, material and spiritual, outer and inner, public and private, rational and mystical. Dixon shows how Sterry, Roach, Stukeley and Hartley shared belief in truly universal salvation was articulated through a language of music, implying a feminising influence that set these male individuals apart from contemporaries who often strictly emphasised the rational, i.e. the supposedly masculine aspects of religion. Musical discourse instead provided a link to a spiritual plane that brought these intellectuals closer to ultimate reality. Theirs was a discourse firmly rooted in the real existence of contemporary musical practices, both in terms of the forms and styles implied in the writings under discussion and the physical circumstances in which these musical genres were created and performed. Through exploring ways in which the idea of music was employed in written transmission of elite ideas, this book challenges conventional classifications of a seventeenth-century Scientific Revolution and an eighteenth-century Enlightenment, defending an alternative narrative of continuity and change across a number of scholarly disciplines from seventeenth-century English intellectual history and theology to musicology and the social history of music.

**A Harmony of the Spirits** Patrick M. Erben, 2013-06-10

In early Pennsylvania translation served as a utopian tool creating harmony across linguistic religious and ethnic differences Patrick Erben challenges the long standing historical myth first promulgated by Benjamin Franklin that language diversity posed a threat to communal coherence He deftly traces the pansophist and Neoplatonist philosophies of European reformers that informed the radical English and German Protestants who founded the holy experiment Their belief in hidden yet persistent links between human language and the word of God impelled their vision of a common spiritual idiom Translation became the search for underlying correspondences between diverse human expressions of the divine and served as a model for reconciliation and inclusiveness Drawing on German and English archival sources Erben examines iconic translations that engendered community in colonial Pennsylvania including William Penn's translingual promotional literature Francis Daniel Pastorius's multilingual poetics Ephrata's angelic singing and transcendent calligraphy the Moravians polyglot missions and the common language of suffering for peace among Quakers Pietists and Mennonites By revealing a mystical quest for unity Erben presents a compelling counternarrative to monolingualism and Enlightenment empiricism in eighteenth century America
