Turks, Jews, and Other Germans in Contemporary Art Peter Chametzky, 2021-09-14 The first book to examine multicultural visual art in Germany discussing more than thirty contemporary artists and arguing for a cosmopolitan Germanness With *Turks Jews and Other Germans in Contemporary Art* Peter Chametzky presents a view of visual culture in Germany that leaves behind the usual suspects those artists who dominate discussions of contemporary German art including Gerhard Richter Anselm Kiefer and Rosemarie Trockel and instead turns to those artists not as well known outside Germany including Maziar Moradi Hito Steyerl and Tanya Ury In this first book length examination of Germany's multicultural art scene Chametzky explores the work of more than thirty German artists who are among other ethnicities Turkish Jewish Arab Asian Iranian Sinti and Roma Balkan and Afro German With a title that echoes Peter Gay's 1978 collection of essays *Freud Jews and Other Germans* this book like Gay's rejects the idea of us and them in German culture Discussing artworks in a variety of media that both critique and expand notions of identity and community Chametzky offers a counternarrative to the fiction of an exclusively white Christian German culture arguing for a cosmopolitan Germanness He considers works that deploy critical confrontational and playful uses of language especially German and Turkish that assert the presence of foreign bodies among the German body politic that grapple with food as a cultural marker that engage with mass media and that depict and inhabit spaces imbued with the element of time American discussions of German contemporary art have largely ignored the emergence of non ethnic Germans as some of Germany's most important visual artists *Turks Jews and Other Germans in Contemporary Art* fills this gap

Germans in the Southwest, 1850-1920 Tomas Jaehn, 2005 A history of the German presence in the American Southwest from the mid nineteenth century through the World War I era

German Art in New York Gregor Langfeld, 2025-10-01 Why did the Museum of Modern Art and the Guggenheim in New York and art collectors and curators such as Katherine Dreier and Alfred Barr collect modern German art in the first half of the twentieth century And why did certain works of art belong to the canon while others did not In this book Gregor Langfeld argues that National Socialism played a crucial role in the canonization of movements such as Expressionism and the Bauhaus A role which undermined the post 1945 reputations of many artists associated with classical and figurative trends Langfeld offers important new insights into the political and ideological motivations behind the New York art world's fluctuations in opinion fashion and price

Museums in the German Art World James J. Sheehan, 2000-10-26 Combining the history of ideas institutions and architecture this study shows how the museum both reflected and shaped the place of art in German culture from the late eighteenth century to the

early twentieth century On a broader level it illuminates the origin and character of the museum's central role in modern culture James Sheehan begins by describing the establishment of the first public galleries during the last decades of Germany's old regime He then examines the revolutionary upheaval that swept Germany between 1789 and 1815 arguing that the first great German museums reflected the nation's revolutionary aspirations By the mid nineteenth century the climate had changed museums constructed in this period affirmed historical continuities and celebrated political accomplishments During the next several years however Germans became disillusioned with conventional definitions of art and lost interest in monumental museums By the turn of the century the museum had become a site for the political and cultural controversies caused by the rise of artistic modernism In this context Sheehan argues we can see the first signs of what would become the modern style of museum architecture and modes of display The first study of its kind this highly accessible book will appeal to historians museum professionals and anyone interested in the relationship between art politics and culture

Aesthetics and the Art of Musical Composition in the German Enlightenment Johann Georg Sulzer, 1995 Can an abstract theory of *Empfindsamkeit* aesthetics have any value to a musician wishing to study composition in the classical style The eighteenth century German theorist and pedagogue Heinrich Koch showed how this question could be answered with a resounding yes Starting with the systematic aesthetic theory of the Swiss encyclopedist Johann Sulzer Koch was creatively able to adapt Sulzer's conservative ideas on ethical mimesis and rhetoric to concrete problems of music analysis and composition In this collaborative study Thomas Christensen and Nancy Baker have translated and analysed selected writings of Sulzer and Koch respectively bringing to life a little known confluence of philosophical and musical thought from the German Enlightenment Koch's appropriation of Sulzer's ideas to the service of music represents an important development in the evolution of Western musical thought

The Moment of Self-Portraiture in German Renaissance

Art Joseph Leo Koerner, 1993 So foundational is this invention to modern aesthetics Koerner argues that interpreting it takes us to the limits of traditional art historical method Self portraiture becomes legible less through a history leading up to it or through a sum of contexts that occasion it than through its historical sight line to the present After a thorough examination of

Durer's startlingly new self-portraits the author turns to the work of Baldung Durer's most gifted pupil and demonstrates how the apprentice willfully disfigured Durer's vision Baldung replaced the master's self-portraits with some of the most obscene and bizarre pictures in the history of art In images of nude witches animated cadavers and copulating horses Baldung portrays the debased self of the viewer as the true subject of art The Moment of Self-Portraiture thus unfolds as passages from teacher to student artist to viewer reception all within a culture that at once deified and abhorred originality The Visual Arts in Germany, 1890-1937 Shearer West, 2000 This work provides an introduction to the visual arts in Germany from the early years of German unification to World War II The study is an analysis of painting sculpture graphic art design film and photography in relation to a wider set of cultural and social issues that were specific to German modernism It concentrates on the ways in which the production and reception of art interacted with and was affected by responses to unification conflict between left and right political factions gender concerns contemporary philosophical and religious ideas the growth of cities and the increasing importance of mass culture *Swiss-German and Dutch-German Mennonite traditional art in the Waterloo Region, Ontario* Nancy-Lou Patterson, 1979-01-01 The folk art of the Swiss German Mennonites living in the Waterloo Ontario region is compared with that of the Dutch German Mennonites from the same area Traditional arts discussed include Fraktur needlework wood working and cooking Published in English **Art and the German Bourgeoisie** Carolyn Helen Kay, 2002-01-01 In this new study of art in fin de siècle Hamburg Carolyn Kay examines the career of the city's art gallery director Alfred Lichtwark one of Imperial Germany's most influential museum directors and a renowned cultural critic A champion of modern art Lichtwark stirred controversy among the city's bourgeoisie by commissioning contemporary German paintings for the Kunsthalle by secession artists and supporting the formation of an independent art movement in Hamburg influenced by French impressionism Drawing on an extensive amount of archival research and combining both historical and art historical approaches Kay examines Lichtwark's cultural politics their effect on the Hamburg bourgeoisie and the subsequent changes to the cultural scene in Hamburg Kay focuses her study on two modern art scandals in Hamburg and shows that Lichtwark faced strong public resistance in the 1890s winning significant support from the city's bourgeoisie only after 1900 Lichtwark's struggle to gain acceptance for impressionism highlights conflicts within the city's middle class as to what constituted acceptable styles and subjects of German art with opposition groups demanding a traditional and pure German culture The author also considers who within the Hamburg bourgeoisie supported Lichtwark and why Kay's local study of the debate over cultural modernism in Imperial Germany makes a significant contribution both to the study of modernism and to the history of German culture **Pennsylvania Germans** Simon J. The History of Ancient Art Among the Greeks. Translated from the German by ... G. Henry Lodge
Johann Joachim Winckelmann, 1856 Greeks, Romans, Germans Johann Chapoutot, 2016-09-20 Much has been written about the conditions that made possible Hitler's rise and the Nazi takeover of Germany but when we tell the story of the National Socialist Party should we not also speak of Julius Caesar and Pericles Greeks Romans Germans argues that to fully understand the racist violent end of the Nazi regime we must examine its appropriation of the heroes and lessons of the ancient world When Hitler told the assembled masses that they were a people with no past he meant that they had no past following their humiliation in World War I of which to be proud The Nazis constant use of classical antiquity in official speeches film state architecture the press and state sponsored festivities conferred on them the prestige and heritage of Greece and Rome that the modern German people so desperately needed At the same time the lessons of antiquity served as a warning Greece and Rome fell because they were incapable of protecting the purity of their blood against mixing and infiltration To regain their rightful place in the world the Nazis had to make all out war on Germany's enemies within and without
