France, Germany, and Nuclear Deterrence Nicolas Badalassi, Frédéric Gloriant, 2022-01-14 The legacy of World War II and the division of Eastern and Western Europe produced a radical asymmetry and a variety of misgivings and misunderstandings in French and German experiences of the nuclear age At the same time however political actors in both nations continually labored to reconcile their differences and engage in productive strategic dialogue Grounded in cutting edge research and freshly discovered archival sources France Germany and Nuclear Deterrence teases out the paradoxical nuclear interactions between France and Germany from 1954 to the present day

West Germany, Cold War Europe and the Algerian War Mathilde Von Bulow, 2016-08-22 Examining the clandestine and subversive activities of Algerian nationalists in West Germany and Europe Mathilde Von Bulow sheds new light on the extent to which FLN activities and French counter measures impacted the conflict in Algeria and the politics of the global Cold War

France and the German Question, 1945-1990 Frédéric Bozo, Christian Wenkel, 2019-07-12 In the immediate aftermath of World War Two the victors were unable to agree on Germany's fate and the separation of the country the result of the nascent Cold War emerged as a de facto if provisional settlement Yet East and West Germany would exist apart for half a century making the German question a central foreign policy issue and given the war torn history between the two countries this was felt no more keenly than in France Drawing on the most recent historiography and previously untapped archival sources this volume shows how France's approach to the German question was for the duration of the Cold War both more constructive and consequential than has been previously acknowledged

France and the Construction of Europe, 1944-2007 Michael Sutton, 2011-03 This comprehensive history shows how France coupled the pursuit of power and the furtherance of European integration over a 60 year period from the close of the Second World War to the hesitation caused by the French electorate's referendum rejection of the European Union's constitutional treaty in 2005

A Certain Idea of France Phillip H. Gordon, 1993-04-05 As France begins to confront the new challenges of the post Cold War era the time has come to examine how French security policy has evolved since Charles de Gaulle set it on an independent course in the 1960s Philip Gordon shows that the Gaullist model contrary to widely held beliefs has lived on but that its inherent inconsistencies have grown more acute with increasing European unification the diminishing American military role in Europe and related strains on French military budgets The question today is whether the Gaullist legacy will enable a strong and confident France to play a full role in Europe's new security arrangements or whether France because of its will to independence is destined to play an isolated national role Gordon analyzes military doctrines strategies and budgets from the 1960s to the 1990s and also the evolution of French policy from the early debates about NATO and the European Community to the Persian Gulf War He reveals how and why Gaullist ideas have for so long influenced French security policy and

examines possible new directions for France in an increasingly united but potentially unstable Europe

Brief summary of the complete frame of the German Question (1945-1990) Johann Albert Wiechers, 2020-02-25 At the moment of the publication of this book 75 years have passed since the defeat and beginning of the occupation of Germany by the victorious Allies and 30 years since the reunification of the country within restricted boundaries after 45 years of division I was born in the New World 20 years after the end of the war lived most of my youth with the reality of the division and witnessed the whole reunification process as a member of a family of German descent living outside Germany My interest in the subject plus several logical links to Germany a vision from abroad and obviously my knowledge of German helped me to start preparing in 1987 well before any possibility of reunification existed a legal thesis which unexpectedly even for me turned into reality with the fall of the Berlin Wall in 1989 and the reunification in 1990 I was able to deliver the final work my professional thesis personally into the hands of Federal President Richard von Weizsäcker during his state visit to Mexico in 1992 And shortly thereafter I received from him a very rewarding letter But just now after 30 years I am able to publish in English this reworked and updated version of my original thesis now as a history book I have tried to condense and explain the facts of 45 years of division so Germans and foreigners can have a full and objective view of all the aspects historical political territorial and legal alike pertaining to the so called German Question during the period 1945-1990 I hope you enjoy it

France and the Reunification of Germany Tilo Schabert, 2021-10-12 With the collapse of the Soviet Union and its Eastern European bloc the reunification of Germany was a major episode in the history of modern Europe and one widely held to have been opposed by that country's centuries old enemy France But while it has been previously believed that French President François Mitterrand played a negative role in events leading up to reunification this book shows that Mitterrand's main concern was not the potential threat of an old nemesis but rather that a reunified Germany be firmly anchored in a unified Europe Updated with a new introduction and other materials the book blends primary research and interviews with key actors in France and Germany to take readers behind the scenes of world governments as a new Europe was formed Tilo Schabert had unprecedented exclusive access to French presidential archives and here focuses on French diplomacy not only to dispel the notion that Mitterrand was reluctant to accept reunification but also to show how successful he was in bringing it about

Non-Fiction Cinema in Postwar Europe Lucie Cesalkova, Johannes Praetorius-Rhein, Perrine Val, Paolo Villa, 2025-10-01 After WWII cinema was everywhere in movie theatres public squares factories schools trial courts trains museums and political meetings Seen today documentaries and newsreels as well as the amateur production show the kaleidoscopic portrait of a changing Europe How did these cinematic images contribute to shaping the new societies emerging from the ashes of war both in the Western and in the Eastern bloc Why were they so crucial in framing and regulating new places and practices political systems economic dynamics educational frameworks and memory communities This edited volume explores the multiple ways nonfiction cinema reconfigured public spaces collective participation

democratisation and governmentality between 1944 and 1956 Looking back at it through a transnational perspective and the critical category of spatiality nonfiction cinema appears in a new light simultaneously as a specifically situated and as a highly mobile medium it was a fundamental agent in reshaping Europe's shared identity and culture in a defining decade

France Restored William I. Hitchcock, 2000-11-09 Historians of the Cold War argues William Hitchcock have too often overlooked the part that European nations played in shaping the post World War II international system In particular France a country beset by economic difficulties and political instability in the aftermath of the war has been given short shrift With this book Hitchcock restores France to the narrative of Cold War history and illuminates its central role in the reconstruction of Europe Drawing on a wide array of evidence from French American and British archives he shows that France constructed a coherent national strategy for domestic and international recovery and pursued that strategy with tenacity and effectiveness in the first postwar decade This once occupied nation played a vital part in the occupation and administration of Germany framed the key institutions of the new Europe helped forge the NATO alliance and engineered an astonishing economic recovery In the process France successfully contested American leadership in Europe and used its position as a key Cold War ally to extract concessions from Washington on a wide range of economic and security issues **Mitterrand, the**

Britain France and the Federal Republic of Germany helped China reintegrate into the international community in the 1970s Against the background of the Cold War the end of Maoism and the emergence of globalization the governments in Bonn Paris and London had to find ways of dealing with Europe s declining influence and promote their own national interests in Asia Based on newly declassified government files readers will find such sources invaluable in understanding the argument that despite pursuing very different policies the three governments supported a rapid expansion of peaceful exchange between the People s Republic and Europe and substantially contributed to the success of Beijing s reform policy
