George Hudson The Rise And Fall Of The Railway King:

George Hudson Brian J. Bailey, 1995 *Railway king* Todd Houghton, George Hudson Tony Arnold, Sean McCartney, 2004 The Robert Maxwell of the nineteenth century Victorian England's greatest capitalist Brought down by a shareholder's question The building of the railways in Britain in the nineteenth century was the greatest ever industrial undertaking in the world to that time Financed by private enterprise rather than the state the schemes to build new lines were characterised both by their ambition and by their need for huge amounts of capital The most ambitious of all of the individual entrepreneurs and for long the most successful was George Hudson the Railway King whose establishment of York as the hub of an ever growing network of lines brought him huge wealth and great fame Already a wealthy businessman and Lord Mayor of York before the advent of the railways Hudson seized the opportunity they presented with both hands He became an MP lived in style and entertained lavishly While his early lines were profitable later ones were not Ever more deeply committed at a time when accounting standards were lax he hid inconvenient figures until brought down by a question at a shareholders meeting in 1849 Disgraced he fled to the Continent his name synonymous with fraudulent capitalism at its most brazen This new biography is the fullest examination to date of an extraordinary and complex man and his career *The World's First Railway System* Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography *Don't Fall For It* Ben Carlson, 2020-01-02 Learn financial and business lessons from some of the biggest frauds in history Why does financial fraud persist History is full of sensational financial frauds and scams Enron was forced to declare bankruptcy after allegations of massive accounting fraud
