Fite, 2021-10-21 No general history of southern farming since the end of slavery has been published until now For the first time Gilbert C Fite has drawn together the many threads that make up commercial agricultural development in the eleven states of the old Confederacy to explain why agricultural change was so slow in the South and then to show how the

agents of change worked after 1933 to destroy the old and produce a new agriculture Fite traces the decline and departure of King Cotton as the hard taskmaster of the region and the replacement of cotton by a somewhat more democratically rewarding group of farm products poultry cattle swine soybeans citrus and other fruits vegetables rice dairy products and forest products He shows how such crop changes were related to other developments such as the rise of a capital base in the South mainly after World War II technological innovation in farming equipment and urbanization and regional population shifts Based largely upon primary sources Cotton Fields No More will become the standard work on post Civil War agriculture in the South It will be welcomed by students of the American South and of United States agriculture economic and social history

Schlesinger,2003-07-09 Volume two of the Pulitzer Prize winning author s Age of Roosevelt series describes Franklin Delano Roosevelt s first tumultuous years in the White House Coming into office at the bottom of the Great Depression FDR told the American people that they have nothing to fear but fear itself The conventional wisdom having failed he tried unorthodox remedies to avert economic collapse His first hundred days restored national morale and his New Dealers filled Washington with new approaches to recovery and reform Combining idealistic ends with realistic means Roosevelt proposed to humanize redeem and rescue

The Rise of the Agricultural Welfare State Adam D. Sheingate, 2021-05-11 A long dominant reading of American politics holds that public policy in the United States is easily captured by special interest groups Countering this view Adam Sheingate traces the development of government intervention in agriculture from its nineteenth century origins to contemporary struggles over farm subsidies His considered conclusion is that American institutions have not given agricultural interest groups any particular advantages in the policy process in part because opposing lobbies also enjoy access to policymakers In fact the high degree of conflict and pluralism maintained by American institutions made possible substantial retrenchment of the agricultural welfare state during the 1980s and 1990s In Japan and France two countries with markedly different institutional characters than the United States powerful agricultural interests and a historically close relationship between farmers bureaucrats and politicians continue to preclude a roll back of farm subsidies This well crafted study not only puts a new spin on agricultural policy but also makes a strong case for the broader claim that the relatively decentralized American political system is actually less prone to capture and rule by subgovernments than the more centralized political systems found in France and Japan Sheingate's historical comparative approach also demonstrates in a widely useful way how past institutional developments shape current policies and options

The Dead Pledge Judge Earl Glock,2021-04-06 The American government today supports a financial system based on mortgage lending and it often bails out the financial institutions making these mortgages The Dead Pledge reveals the surprising origins of American mortgages and American bailouts in policies dating back to the early twentieth century Judge Glock shows that the federal government began subsidizing mortgages in order to help lagging sectors of the economy such as farming and construction In order to encourage mortgage lending the government also extended unprecedented assistance to banks During the Great Depression the federal government made new mortgage lending and bank bailouts the centerpiece of its recovery program Both the Herbert Hoover and Franklin Roosevelt administrations created semipublic financial institutions such as Fannie Mae to provide cheap tradable mortgages and they extended guarantees to more banks and financiers Ultimately Glock argues the desire to protect the financial system took precedence over the desire to help lagging parts of the economy and the government became ever more tied into the financial world The Dead Pledge recasts twentieth century economic financial and political history and demonstrates why the greatest safety net created in this era was the one supporting finance
