One Europe, Many Nations James B. Minahan, 2000-07-30 Dominating world politics since 1945 the Cold War created a fragile peace while suppressing national groups in the Cold War's most dangerous theater Europe Today with the collapse of Communism the European Continent is again overshadowed by the specter of radical nationalism as it was at the beginning of the century Focusing on the many possible conflicts that dot the European landscape this book is the first to address the Europeans as distinct national groups not as nation states and national minorities It is an essential guide to the national groups populating the so called Old World groups that continue to dominate world headlines and present the world community with some of its most intractable conflicts While other recent reference books on Europe approach the subject of nations and nationalism from the perspective of the European Union and the nation state this book addresses the post Cold War nationalist resurgence by focusing on the most basic element of any nationalism the nation It includes entries on nearly 150 groups surveying these groups from the earliest period of their national histories to the dawn of the 21st century In short essays highlighting the political social economic and historical evolution of peoples claiming a distinct identity in an increasingly integrated continent the book provides both up to date information and historical background on the European national groups that are currently making the news and those that will produce future headlines      Conflict in Nagorno-Karabakh, Abkhazia and South Ossetia Tim Potier, 2021-12-28 The conflicts in the South Caucasus are now a decade old but still appear impervious to solution The hopes that independence raised have been dashed by an insidious cocktail of past and present regional hegemony historical antipathy and Soviet planning Armenia Azerbaijan and Georgia thus continue to wait for their long awaited Spring In a region where Western academic writing has focussed during the last decade almost exclusively on the dynamics of regional security and Great Power rivalry even in the context of conflict this volume provides an important and necessary legal appraisal of the possible processes and structures which may ultimately facilitate the

finding of constitutional settlement in Nagorno Karabakh Abkhazia and South Ossetia In the work Tim Potier an academic lawyer with much experience in the Caucasus has written a powerful but dispassionate account which will prove not only to be of use to academics diplomats and government officials working in the region but also be of lasting value to the ongoing development of the international law on self determination and autonomy Dr Potier also considers the fate of what he prefers to term regionally non dominant titular peoples

**Rebel Militias in Eastern Ukraine** Martin Laryš,2024-08-27 This book extends principal agent theory to the case of pro Russian rebel militias in Eastern Ukraine Russia s war in Ukraine demonstrates the much discussed relations between the principal Russia and agent rebel militias in Eastern Ukraine Russia s aggression against Ukraine in 2014 was a frontal challenge to the post Cold War European regional order and since 2022 it has offered a challenge to the global order Filling the gap in the literature on indirect warfare and insurgencies this book offers systematic insights into structures and relations within the leaderless rebellion in the Donetsk and Luhansk Oblasts It introduces the concept of the delegation of leaderless rebellion based on the argument that it is a specific kind of rebellion when local elites do not actively participate as the leaders of the rebellion Random people without any fighting or political experience and with no social embeddedness become rebel commanders which means the principal Russia faces serious challenges but also benefits from opportunities to exercise complete control over the rebel forces and administration This book will be of much interest to students of civil wars and insurgencies political violence Eastern European politics and international relations in general

Nationalism in Late and Post-Communist Europe Egbert Jahn,2008 The breakdown of the Communist party rule was accompanied by an unexpected renaissance of nationalism and secessionism Of the nine Communist states only five nation states have survived Whereas the German Democratic Republic became unified with the Federal Republic of Germany the three multinational states dissolved into 16 hybrid ethno national states and two states of federated nations The latter remain imperiled in their territorial integrity In all countries state and ethnic nationalism combine in peculiar ways which leaves room for sub national stateness and various other forms of ethnic and national heterogeneity In this volume experts describe the unfolding of nationalism in each of the post Communist states during the period of upheaval from 1985 to 1995 First the relationship of the titular ethnic group with its own ethnic nationalism is discussed as well as the nationalism that refers to the whole state including the minorities This relationship influences the way the states treat the minorities which often aim for sub stateness or at least for representation through a political party organization

**Check List of the Geometridae of the former U.S.S.R.** Jaan Viidalepp, 2023-07-03 The first edition of this checklist was published in Russian language 1976-79 and contained 1247 species Since then the amount of information has been doubled and the present list comprises 1486 species The aim of this checklist is to summarize personal results obtained from faunistic investigations from the study of literature sources and collections of Geometridae in museums as well as from discussions with colleagues during the last thirty years Besides being a check list this book also gives information of the distribution of the species in this huge area **RAOP**, 1995 Russia's Recognition of the Independence of Abkhazia and South Ossetia Nikoloz Samkharadze, 2021-05-18 The Russian Federation's official acknowledgement of the independence of Abkhazia and South Ossetia in August 2008 has since been undermining both overall political stability in the Southern Caucasus in general and future perspectives of Georgia's development in particular Such recognition of new quasi legal entities without consent of the parent state and a subsequent erosion of the principle of territorial integrity are pressing challenges in current world affairs The Kremlin's controversial 2008 decision continues to be an important bone of contention in Russian Western relations This study explores the emergence and recent transformation of modern norms of recognition secession and self determination in international law It traces the evolution of Soviet and Russian perspectives on the recognition of new states and discusses overall Georgia Russia relations in order to answer the question Why did the Kremlin recognize Georgia's two breakaway entities in contradiction to traditional Russian approaches to recognition The author argues that Moscow's deviant behavior vis vis Tbilisi was caused by three major reasons namely the earlier recognition of Kosovo by many Western nations in disregard of Russia's stance the intention to prevent Georgia's accession to NATO and the necessity to legitimize a continued presence of Russian armed forces in Georgia's two breakaway provinces **AB Bookman's Weekly**, 1996
