Geothermal Energy Development Problems Prospects In The Imperial Valley Of California:

Geothermal Energy Development Edgar W. Butler, James B. Pick, 2012-12-06 What are the effects on an isolated region when an entirely new and major energy resource is developed to commercial proportions What happens to the population the economy the environment the community and societal relations How does the government frame work respond the family structure adapt the economy expand and life styles change under the impact of new forces which hold a promise of much benefit and a risk of adverse consequences Imperial County California has a population of less than 90 000 people This population has been exceptionally stable for years centered as it is in an agricultural and recreational framework The county is somewhat cut off from other areas by geographic barriers of mountains and desert by state and natural boundaries and is the most remote of all 58 counties of California from the state capitol Sacramento In the decade of the 1950s geographical explorations for oil revealed some anomalous structures underlying the desert and agricultural areas in Imperial County These when drilled seemed to be oil less and hot and so lacked attractiveness to petroleum wildcatters In the decade of the 1960s Dr

Renewable Energy: Problems and Prospects in Coachella Valley, California James B. Pick, 2017-02-07 The book analyzes the problems and potential of renewable energy development for the Coachella Valley of California and provides a useful case study for renewable energy feasibility assessments for other areas A conceptual model Integrated Policy Assessment Theory for Renewable Energy is given and justified for renewable energy development in the Valley Further Central Place Theory well known in urban geography is discussed and it is seen to be very relevant to the understanding the Coachella Valley's city sizes and renewable energy markets compared to the greater Los Angeles region The book's research methods include geospatial mapping and analysis and interviews leaders in small innovative firms government agencies and nonprofits The many findings of the book include evaluation of how the Valley's socioeconomic and transportation features influence renewable energy development the scope of markets for solar and wind energy in the Valley spatial confluences of renewable energy facilities with other features and the future potential of ground source heat pumps Benchmark comparison of the Coachella Valley is done with two leading wind and solar regions elsewhere in the country to assess the Valley's evolution and opportunities in renewable energy The book concludes by evaluating the prospects and problems for the growth of renewable entrepreneurship manufacturing assembly and operations in Coachella Valley This leads to policy recommendations grounded in the book's research findings which are intended for use by governments businesses and nonprofits The hope is that many of the developmental experiences from the Coachella Valley will be helpful not only within the Valley but to other communities nationwide and worldwide

Donald Robert Coates,2012-12-06 Mankind lives works and plays on the earth s surface The majority of such human activities change in some manner the geological materials and processes of our planet It is the basis of this book that an understanding of this relationship is significant Furthermore it is demonstrated that natural processes and events can in turn greatly affect society Erosion devastates farms and grazing lands The spectacular hazards of earthquakes volcanoes floods and landslides can lead to disastrous loss of life and property Thus one theme in this book is to provide perspective on the duality of these impacts on the environmental scene Geology is a key component that can lead to an improved understanding of these changes and influences A care full orchestration of geological studies can help soften the deleterious aspects of nature and minimize the harmful byproducts of civilization This is the central message that is repeated throughout these pages This book is one of a series of volumes published and in preparation in the series entitled Environmental Resources Management Books already in print include two on soils and others on mineral resources and land use planning These will be followed by books on surface water resources groundwater resources environmental pollution energy resources coastal environments glacial environments arid regional environments and others Chapter 1 provides the introduction and sets the stage and tone for the book Chapters 2 3 and 4 deal with the resource base of society minerals fuels and water **Energy Research and Development Policy Act** United States.
