Whether you suffer from high blood pressure, high cholesterol, chronic heartburn, GERD, arthritis, diabetes, or depression, the prescription drugs you are taking can actually make your condition worse. Why didn't your doctor warn you about this possible side effect? Most office visits are short and time is limited. And the truth is many doctors have very little knowledge about nutrition and how it affects your overall health and well-being. As a result, your doctor is unlikely to tell you how to supplement your prescription. Dr. Cass offers essential information to complement your doctor's advice. This straightforward, easy-to-use guide explains how drugs interfere with your body's ability to absorb and use vital nutrients. What nutrient depletions and side effects you can expect with the most frequently prescribed drugs.
