Rottman, 2012-06-20 Most belligerents entering World War II armed their infantry with bulky and ineffectual anti tank rifles as their primary means of combating tanks US planners realized that what infantrymen needed was a relatively

lightweight man portable anti tank weapon that was simple to operate accurate and capable of knocking out the average tank at a reasonable range while also being effective against fortified buildings pillboxes and personnel in the open The bazooka combined a revolutionary new anti tank rifle grenade warhead a much modified British anti aircraft rocket motor and a cobbled together launcher tube and electrical firing system its first test firing astounded observers and it was immediately adopted by the US armed forces Featuring specially drawn colour artwork this engaging study tells the story of the bazooka which set the standard for future light anti tank weapons and their ammunition and was a key influence on anti tank tactics and techniques in the post war era
