German Light Panzers 1932-42 Bryan Perrett,1983 *Panzers I & II* Bob Carruthers,2013-05-17 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen Almost from the outset the limitations of the design for the Panzer I were obvious It was essentially a training vehicle which was only pressed into service as a last resort It was to be succeeded by the Panzer II which could at least engage armoured cars and combat against tanks with approximately the same armour as itself Together these two tanks formed the bulk of the armour which between 1939 and 1941 conquered half of Europe This comprehensive overview of the light Panzers in action was compiled by Emmy Award winning historian Bob Carruthers It draws heavily on war time intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level Also featured are rare developments such as the Panzer II flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study from an array of primary sources of the world of the light Panzer and their crews from contemporary Allied sources *Light Panzers* Thomas Anderson,2025-04-24 This highly illustrated new study tells the full story of the German light Panzers in World War II The light Panzers that equipped the first Panzer divisions were originally intended as training or stopgap machines suitable only until the arrival of the better armed and armoured PzKpfw III and PzKpfw IV However despite their limitations they ended up playing key roles in the victorious campaigns waged by the German Army from 1939 to 1942 This highly illustrated title describes the development and organizational history of the PzKpfw I introduced in 1934 and the PzKpfw II introduced in 1936 It explains how the annexation of German speaking Sudetenland in 1938 and subsequently of Czechoslovakia itself delivered an unexpected bonus for the Panzerwaffe in the form of two Czech Army light tanks introduced into German service as the PzKpfw 35 t and PzKpfw 38 t It goes on to cover the considerable operational service of these tanks in Poland France and the invasion of the Soviet Union in 1941 From late 1941 onwards they were withdrawn from front line service but the chassis were used until the end of the war for self propelled artillery and tank destroyers German armour expert Thomas Anderson draws on archival material after action reports and rare photographs in this comprehensive study of the German light Panzers that played a key role in the early years of World War II *Panzers I & II* Bob Carruthers,2013 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen Almost from the outset the limitations of the design for the Panzer I were obvious It was essentially a training vehicle which was only pressed into service as a last resort It was to be succeeded by the Panzer II which could at least engage armored cars and combat against tanks with approximately the same armor as itself Together these two tanks formed the bulk of the armor which between 1939 and 1941 conquered half of Europe Emmy Award winning historian Bob Carruthers compiled this comprehensive overview of the light Panzers in action It draws heavily on wartime intelligence reports to produce a fascinating insight into the development and combat history of
