German Architecture For A Mass Audience:

German Architecture for a Mass Audience Kathleen James-Chakraborty, 2002-09-06 This book vividly illustrates the ways in which buildings designed by many of Germany's most celebrated twentieth century architects were embedded in widely held beliefs about the power of architecture to influence society. *German Architecture for a Mass Audience* also demonstrates the way in which these modernist ideas have been challenged and transformed most recently in the rebuilding of central Berlin.

German Architecture for a Mass Audience Kathleen James-Chakraborty, 2000 Focusing on the idea of architecture for a mass audience Kathleen James Chakraborty addresses issues of space, simplicity, spirituality and spectacle.

Architecture, Politics, and Identity in Divided Berlin Emily Pugh, 2014-03-21 On August 13, 1961, under the cover of darkness, East German authorities sealed the border between East and West Berlin using a hastily constructed barbed wire fence. Over the next twenty-eight years of the Cold War, the Berlin Wall grew to become an ever-present physical and psychological divider in this capital city and a powerful symbol of Cold War tensions. Similarly, stark polarities arose in nearly every aspect of public and private life, including the built environment. In *Architecture, Politics, and Identity in Divided Berlin*, Emily Pugh provides an original comparative analysis of selected works of architecture and urban planning in both halves of Berlin during the Wall era, revealing the importance of these structures to the formation of political, cultural, and social identities. Pugh uncovers the roles played by organizations such as the Foundation for Prussian Cultural Heritage and the Building Academy in conveying the political narrative of their respective states through constructed spaces. She also provides an overview of earlier notable architectural works to show the precursors for design aesthetics in Berlin at large and considers projects in the post-Wall period to demonstrate the ongoing effects of the Cold War. Overall, Pugh offers a compelling case study of a divided city poised between powerful contending political and ideological forces, and she highlights the effort expended by each side to influence public opinion in Europe and around the world through the manipulation of the built environment.

Modern Religious Architecture in Germany, Ireland and Beyond Lisa Godson, Kathleen James-Chakraborty, 2019-03-07 Modernity and religion are not mutually exclusive. Setting German and Irish church, synagogue, and mosque architecture side by side over the last century highlights the place for the celebration of the new within faiths whose appeal lies in part in the stability of belief they offer across time. Inspired by radically modern German churches of the 1920s and 1930s, this volume offers new insights into designers of all three types of sacred buildings working at home and abroad. It offers new scholarship on the unknown phenomenon of mid-century ecclesiastical architecture in sub-Saharan Africa by Irish designers, a critical appraisal of the overlooked Frank Lloyd Wright-trained Andrew Devane, and an analysis of accommodating difficult pasts and challenging futures with contemporary synagogue and mosque architecture in Germany. With a focus on influence and processes alongside conservationists and historians, it features critical insights by the designers of some of the most celebrated contemporary sacred buildings, including Niall

McLaughlin who writes on his multiple award winning Bishop Edward King Chapel and Amandus Sattler architect of the innovative Herz Jesu Kirche Munich *Germany's other modernity* Leif Jerram, 2018-09-30 This book is about what it meant to build a city in Germany at the turn of the twentieth century It explores the physical spaces and mental attitudes that shaped lives restructured society and conditioned beliefs about the past and expectations for the future in the crucial German generations that formed the young Reich fought the Great War and experienced the Weimar Republic Focusing on ordinary buildings and the way they shaped ordinary lives this study shows how material space could influence the lives of citizens from the ways the elderly slept at night to the economy of the city as a whole It also shows how we integrate the spaces and places of our lives into our explanations of politics culture and economics It is aimed at those who want to understand urban modernity Wilhelmine and Weimar Germany the use of space in social policy and politics and the design of cities

Miller, A. Bowdoin Van Riper, 2019-11-06 Dark Forces at Work examines the role of race class gender religion and the economy as they are portrayed in and help construct horror

narratives across a range of films and eras These larger social forces not only create the context for our cinematic horrors but serve as connective tissue between fantasy and lived reality as well While several of the essays focus on name horror films such as IT Get Out Hellraiser and Don t Breathe the collection also features essays focused on horror films produced in Asia Europe and Latin America and on American classic thrillers such as Alfred Hitchcock s Psycho Key social issues addressed include the war on terror poverty the housing crisis and the Time s Up movement The volume grounds its analysis in the films rather than theory in order to explore the ways in which institutions identities and ideologies work within the horror genre

Bruno Taut's Design Inspiration for the Glashaus David Nielsen,2015-09-16 As a formative exemplar of early architectural modernism Bruno Taut s seminal exhibition pavilion the Glashaus literally translated Glasshouse is logically part of the important debate of rethinking the origins of modernism However the historical record of

Bruno Taut's Glashaus has been primarily established by one art historian and critic. As a result the historical record of the Glashaus is significantly skewed toward a singular notion of Expressionism and surprisingly excludes Taut's diverse motives for the design of the building. In an effort to clarify the problematic historical record of the Glashaus this book exposes Bruno Taut's motives and inspirations for its design. The result is that Taut's motives can be found in yet unacknowledged precedents like the botanical inspiration of the Victoria regia lily, the commercial interests of Frederick Keppler as the Director of the Deutsche Luxfer Prismen Syndikat and imitation that derived openly from the Gothic. The outcome is a substantial contribution to the re-evaluation of the generally accepted histories of the modern movement in architecture.

Trash Culture Gillian Pye, 2010. In the late twentieth and early twenty-first centuries concerns about the environment and the future of global capitalism have dominated political and social agendas worldwide. The culture of excess underlying these concerns is particularly evident in the issue of trash, which for environmentalists has been a negative category heavily implicated in the destruction of the natural world. However, in the context of the arts, trash has long been seen as a rich aesthetic resource, and more recently, particularly under the influence of anthropology and archaeology, it has been explored as a form of material culture that articulates modes of identity construction. In the context of such shifting, often ambiguous attitudes to the obsolete and the discarded, this book offers a timely insight into their significance for representations of social and personal identity. The essays in the book build on scholarship in cultural theory, sociology, and anthropology that suggests that social and personal experience is embedded in material culture, but they also focus on the significance of trash as an aesthetic resource. The volume illuminates some of the ways in which our relationship to trash has influenced and is influenced by cultural products, including art, architecture, literature, film, and museum culture.

Christoph Schlingensief Anna Teresa Scheer, 2018-02-22. The first book to focus specifically on the late German artist Christoph Schlingensiefel's theatre work, it subversively merges art, politics, and everyday life to imbue his productions both inside and outside the theatre with a re-energized concept of the political in art. Scheer traces Schlingensiefel's artistic lineage as a filmmaker with no formal training in theatre, whose work does not correspond to theoretical frameworks such as postdramatic theatre, Regietheater, or established categories of political theatre such as Brechtian community and agit-prop theatre. She explores how his work instead draws upon the highly performative gestures of the historical and post-Cold War avant-gardes, as well as the happenings and event-based practices of the sixties. Comprehensive case studies of six diverse theatrical and activist events are offered to demonstrate both the immediacy of Schlingensiefel's response to contemporary social and political events and his use of a range of artistic influences and different genres. Rocky Dutschke 68 1996, Save Capitalism Throw the Money Away 1999, The Berlin Republic or the Ring in Africa 1999, Hamlet 2001, Atta Atta Art Has Broken Out 2003, and the Church of Fear 2003. Key questions such as how his theatre functions as a provocation and how an artist can insert themselves into the powerful flows of imagery produced by the perpetual global news cycle form a coherent line of enquiry throughout each of

the chapters The significance of Schlingensiefel's artistic legacy of politicized theatre making that pioneers new modes of active aesthetic and public engagement in the political realm remains pertinent to topical socio political debates and is of relevance to an international audience across a diversity of disciplines **Trans-Europe Express** Owen
