## German Guided Missiles:

**German Guided Missiles of World War II** Steven J. Zaloga, 2019-11-28 Although not as well known as the V 1 buzz bomb and the V 2 missile the first German missiles to see combat were anti ship missiles the Henschel Hs 293 guided missile and the Fritz X guided bomb These began to see extensive combat in the Mediterranean in 1943 In their most famous use the Italian battleship Roma was sunk by a Fritz X attack in September 1943 when Italy attempted to switch sides The serious threat posed by these missiles led to a vigorous but little known Wizard War by the Allies to develop electronic counter measures the first effort of its kind Besides the anti ship missiles the other major category of German missiles were the air defence missiles Germany suffered extremely heavy losses from Allied strategic bombing attacks and German fighter and flak defences proved increasingly unsuccessful As a result the Luftwaffe began an extensive programme to deploy several families of new air defence missiles to counter the bomber threat including the Wasserfall Schmetterling and others This book traces the origins of these missile programmes and examines their development and use in combat With full colour illustrations and detailed explorations of the stories behind the missiles this study offers a comprehensive overview of German guided missiles in the World War II era

**The Origins of Surface-to-Air Guided Missile Technology** James Mills, 2024-01-05 Author James Mills presents an amazing detailed history review of the German surface to air guided missile technology development Military Review World War II saw the appearance of numerous revolutionary armaments on both sides of the conflict that would radically change the nature of warfare from jet aircraft to the ballistic missile and the atomic bomb The greatest conflagration in history also saw the conception of the first surface to air guided missile systems technology pioneered by German scientists and engineers through an extensive development program which ran from 1942 to 1945 Although the program did not achieve its main objective to introduce a functional weapon system into the Luftwaffe air defense network German research and development in most aspects of the technology was ahead of comparable research in the United Kingdom and the United States The history of the transfer of German SAM

technology to the Allies after 1945 has previously been overshadowed by the well published transfers of the V 1 and V 2 guided missiles This book presents the first complete history of Germany s wartime development of surface to air missile SAM technology how the Allies acquired this secret research towards the end of World War II in Europe and in the early postwar period and how they then exploited this knowledge
