Weinberg, 2010-03-01 Hitler's path to war consisted of two different stages that paralleled the internal development of Germany From 1933 to the end of 1936 he created a diplomatic revolution in Europe From a barely accepted equal Germany became the dominant power on the continent With the remilitarization of the Rhineland the stalemate in the Spanish Civil War the forming of the Axis and the signing of the Anti Comintern Pact the first phase was completed In the second phase the diplomatic initiative in the world belonged to Germany and its partners Germany's march toward war therefore became the central issue in world diplomacy *Documents on German foreign policy*, 1966

Power and Influence after the Cold War Ann L. Phillips, 2000-05-30 Challenging conventional wisdom about German dominance in the new Europe this study presents a new approach to the question of power and influence after the Cold War Inspired by the debate over German hegemony and drawing on intensive fieldwork Ann L Phillips develops two original cases of German relations with East Central Europe to test competing arguments As she convincingly demonstrates the politics of reconciliation and the activities of German party affiliated foundations illustrate German engagement in the region in its dual faces restraint and projection The author uses the less developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other Contributing to the theoretical debate Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo realist or liberal approaches could not The author's fresh perspective and new evidence demonstrate that East Central European states play a much greater role in the influence equation than they did in the past **Agricultural Economics Literature** United States. Tōgō,2010 This book stands out amongst the crop of textbooks on Japanese foreign policy that have been available to date because of its authoritative insider voice Here we not only learn what happened in postwar Japan s foreign policy but what the thinking was behind these decisions This is an invaluable element that brings the reader inside the policy making rooms of the Ministry of Foreign Affairs itself In the process Japan s world view and its own self image are concurrently revealed in fascinating and unexpected ways This book destroys stereotypes and vastly improves the quality of our understanding of Japan as an international player We are spoiled by the wisdom and experience of not just one but three major forces in the shaping of Japan s international existence Mr Togo s own formidable experience plus the seminal contributions of his father and grandfather who was instrumental in the closing phases of World War II All of this makes this book indispensable to those who wish to truly understand Japan in her own terms and through her own eyes Rikki Kersten Professor Modern Japanese Political History Australian National University Ambassador Togo s distinctive account of Japanese foreign policy highlights the impact of the vacuum left by the humiliation of defeat in 1945 It bears witness to the intellectual and diplomatic challenge of finding answers to unresolved issues including managing the U S alliance and enhancing cooperation in Asia Updated to cover the results of the 2009 victory of the Democratic Party of Japan this book shows how its change of course fits into a long term narrative In contrast to more impersonal often unsympathetic analysis of Western authors and the self serving writing of many Japanese Togo offers a guide to Japan s quest not a defense of its choices The result is a wide ranging look at foreign policy over more than 60 years seen from the perspective of an insider attentive to a proud nation s search for its bearings Gilbert Rozman Musgrave Professor of Sociology Princeton University      **Globalizing the Soybean**  
Ines Prodöhl,2023-03-09 Globalizing the Soybean asks how the soybean conquered the West and analyzes why and how the crop gained entry into agriculture and industry in regions beyond Asia in the first half of the twentieth century Historian Ines Prodöhl describes the soybean s journey centered on three hubs Northeast China as the crop s main growing area up to the Second World War Germany to where most of the beans in the interwar period were shipped and the United States which became the leading cultivator of soy worldwide during the 1940s This book explores the German and U S adoption of the soybean being closely tied to global economic and political changes such as the two world wars and the Great Depression The attraction of the soybean to stakeholders on both sides of the Atlantic was linked to a need for cheap alternatives to butter and lard and a desire for greater quantities of meat which led to the soybean becoming a cheap resource for fat and fodder Only occasionally was it also used as food This volume is useful for anyone who is studying or interested in economic history and commodity trading in the twentieth century It is also connected to the histories of capitalism globalization imperialism and materiality The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a
