Germany A Modern History

Marshall Dill

Germany A Modern History:

Germany Marshall Dill, 1970 A dominantly political and social approach to Germany's history through the centuries from its pre Christian era to today A History of Modern Germany Dietrich Orlow, 2018-07-17 A History of Modern Germany is a well established text that presents a balanced survey of the last 150 years of German history stretching from nineteenth century imperial Germany through political division and reunification and into the present day Beginning in the early 1870s and covering topics such as Wilhelmenian Germany the World Wars revolution inflation and putsches the Weimar Republic the Federal Republic and the German Democratic Republic the book offers a comprehensive overview of the entire period of modern German history Fully updated throughout this new edition details foreign policy political and economic history and includes increased coverage of social and cultural history and history from the bottom up as well as containing a new chapter that brings it right up to the present day The book is supported by full discussion of past and present historiographic debates illustrations maps further readings and biographies of key German political economic and cultural figures within the Im Mittelpunkt feature Fully exploring the complicated path of Germany's troubled past and stable present A History of Modern Germany provides the perfect grounding for all students of German history **Germany. A modern history** Marshall Dill Jr., 1961 **A History of Modern Germany** Martin Kitchen, 2011-01-25 Featuring revised and extended coverage the second edition of A History of Modern Germany offers an accessible and engagingly written account of German history from 1800 to the present Provides readers with a long view of modern German history revealing its continuities and changes Features updated and extended coverage of German social change and modernization class religion and gender Includes more in depth coverage of the German Democratic Republic Examines Germany's social political and economic history Covers the unification of Germany the German Empire the Weimar Republic the Third Reich post war division the collapse of Communism and developments since re unification Addresses regional history rather than focusing on the dominant role of Prussia *A History of Modern Germany* Hajo Holborn, 1959 This first volume of a major reassessment of the last five centuries of German history deals with that age of German history which had the widest effect on the rise of modern Western civilization Against the background of medieval culture the author shows the origins of Luther's religion and the growth of various Protestant churches as well as the subsequent restoration of the Roman Catholic Church The history of the religious movements of the Reformation and the Counter Reformation is closely co ordinated with the great transformation simultaneously taking place in the social economic and intellectual institutions of Europe Included are detailed discussions of the effects of the Black Death the rise of the cities Luther's social ethics The Thirty Years War and the Peace of Westphalia in 1648 German History in Modern Times William W. Hagen, 2012-02-13 This history of German speaking central Europe offers a very wide perspective emphasizing a succession of many layered communal identities It highlights the interplay of individual society culture and political power contrasting German with Western patterns Rather than treating the Germans as

a collective whole whose national history amounts to a cumulative biography the book presents the pre modern era of the Holy Roman Empire the nineteenth century the 1914 45 era of war dictatorship and genocide and the Cold War and post Cold War eras since 1945 as successive worlds of German life thought and mentality This book s Germany is polycentric and multicultural including the multinational Austrian Habsburg Empire and the German Jews Its approach to National Socialism offers a conceptually new understanding of the Holocaust The book s numerous illustrations reveal German self presentations and styles of life which often contrast with Western ideas of Germany

A History of Modern Germany Since 1815 Frank Tipton,2003-01-01 Germany continues to fascinate us into the twenty first century because unlike the history or national existence of other European states its very being has been posed as a question Why was there no unified German state until late in the nineteenth century How did Germany become an industrial power What responsibility does Germany bear for the two World Wars This accessible but authoritative study attempts to answer these and other fundamental questions through looking at the economic social political and cultural forces which have created modern Germany The 1848 revolutions ushered in an age of Realism which saw rapid economic development and the creation of the Bismarckian empire However by the early twentieth century Germany s economic expansion and position as a world power began to fracture and growing internal economic social and political contradictions led it with disastrous results into the First World War and the subsequent Weimar Republic Hitler and the Nazi movement proposed a revolution and the creation of a German style and the Second World War Holocaust is arguably the defining event of the twentieth century The Americanization of the German economy and society the economic miracle and euphoria of reunification have in recent years rapidly given way to disillusionment as the major political parties have failed to master outstanding social and environmental problems The German question Germany s place within the European Union continues to be unanswered even within an EU where it is the dominant economic power

Germany and 'The West' Riccardo Bavaj,Martina Steber,2015-04-01 The West is a central idea in German public discourse yet historians know surprisingly little about the evolution of the concept Contrary to common assumptions this volume argues that the German concept of the West was not born in the twentieth century but can be traced from a much earlier time In the nineteenth century the West became associated with notions of progress liberty civilization and modernity It signified the future through the opposition to antonyms such as Russia and the East and was deployed as a tool for forging German identities Examining the shifting meanings political uses and transnational circulations of the idea of the West sheds new light on German intellectual history from the post Napoleonic era to the Cold War

A History of Modern Germany Martin Kitchen,Lauren Faulkner Rossi,2023-08-15 A HISTORY OF MODERN GERMANY A History of Modern Germany provides a comprehensive account of the social political and economic history of Germany from 1800 to the present Written in an engaging and accessible narrative style this popular textbook offers an expansive view of the nation s complex and fragmented past tracing the development of the German national consciousness through

Napoleonic rule the unification of Germany the German Empire the Weimar Republic the Third Reich post war division the collapse of Communism reunification and the first two decades of the 21st century Throughout the text the authors discuss the tensions prompted by structural changes within Germany long term shifts in demographics social and economic reforms and more Now in its third edition *A History of Modern Germany* offers richer coverage of German cultural history the German Democratic Republic modernization class religion and gender Updated chapters explore continuity in imperial projects from Bismarck to Hitler memory and commemoration since 1945 the distinct but intertwined histories of the two Germanys between 1949 and 1989 and the experience of diversity after the Second World into the post unification era *A History of Modern Germany 1800 to the Present Third Edition* is an excellent textbook for undergraduate students taking courses in modern German history or modern European history as well as general readers with an interest in the subject

The Oxford Handbook of Modern German History Helmut Walser Smith, 2011-09-29 This is the first comprehensive multi author survey of German history that features cutting edge syntheses of major topics by an international team of leading scholars Emphasizing demographic economic and political history this Handbook places German history in a denser transnational context than any other general history of Germany It underscores the centrality of war to the unfolding of German history and shows how it dramatically affected the development of German nationalism and the structure of German politics It also reaches out to scholars and students beyond the field of history with detailed and cutting edge chapters on religious history and on literary history as well as to contemporary observers with reflections on Germany and the European Union and on multi cultural Germany Covering the period from around 1760 to the present this Handbook represents a remarkable achievement of synthesis based on current scholarship It constitutes the starting point for anyone trying to understand the complexities of German history as well as the state of scholarly reflection on Germany s dramatic often destructive integration into the community of modern nations As it brings this story to the present it also places the current post unification Federal Republic of Germany into a multifaceted historical context It will be an indispensable resource for scholars students and anyone interested in modern Germany **Germany** Marshall Jr Dill, 1961 **Rewriting German**

History Jan Rüger, Nikolaus Wachsmann, 2015-10-11 *Rewriting German History* offers striking new insights into key debates about the recent German past Bringing together cutting edge research and current discussions this volume examines developments in the writing of the German past since the Second World War and suggests new directions for scholarship in the twenty first century *Germany* Marshall Dill, 1970 **A History of Modern Germany** Hajo Holborn, 1982 A three volume reassessment of the last five centuries of German history **Germany in the Modern World** Sam A. Mustafa, 2016 With a careful blend of concision and rich detail Sam A Mustafa s readable and lively text traces German history from Roman times to the present placing particular emphasis on the past three centuries Balanced and clearly written the book guides readers expertly through the complex tangle of Germany s past Mustafa provides a judicious mix of narrative history and

historiography tracing the influential individuals and broad social currents myths and legends and political and cultural elements that have shaped the country In addition the book is unique in bringing the story fully to the present with a chapter on the past twenty five years that explores the nation s reunification and its struggles with history and memory Generously illustrated with photos artwork and maps the book also includes text boxes to allow readers to pause and consider key concepts in greater detail Each chapter offers a list of further suggested readings with a mixture of classic and recent scholarship to provide a range of coverage of important issues

The Origins of Modern Germany Geoffrey

Barracclough,1984 No one is likely to underrate the importance for the rest of Europe and indeed for world history of the German reaction beginning in the days of Bismarck to the crisis of modern industrial capitalism writes Professor Barracclough but the peculiar character of that reaction is only comprehensible in the light of Germany s past Factors deeply rooted in German history constituted an iron framework a mold within which were cast all German efforts from 1870 to 1939 to cope with the problems of modern capitalist society

The Ashgate Research Companion to Imperial Germany Matthew

Jefferies,2016-03-03 Germany s imperial era 1871 1918 continues to attract both scholars and the general public alike The American historian Roger Chickering has referred to the historiography on the Kaiserreich as an extraordinary body of historical scholarship whose quality and diversity stands comparison with that of any other episode in European history This Companion is a significant addition to this body of scholarship with the emphasis very much on the present and future Questions of continuity remain a vital and necessary line of historical enquiry and while it may have been short lived the Kaiserreich remains central to modern German and European history The volume allows 25 experts from across the globe to write at length about the state of research in their own specialist fields offering original insights as well as historiographical reflections and rounded off with extensive suggestions for further reading The chapters are grouped into five thematic sections chosen to reflect the full range of research being undertaken on imperial German history today and together offer a comprehensive and authoritative reference resource Overall this collection will provide scholars and students with a lively take on this fascinating period of German history from the nation s unification in 1871 right up until the end of World War I

Conflict, Catastrophe and Continuity Frank Biess,Mark Roseman,Hanna Schissler,2007 Offers fresh perspectives on key debates surrounding Germany s descent into and emergence from the Nazi catastrophe This book explores relations between society economy and international policy and provides fresh insights into the complex continuities and discontinuities of modern German history

Germany and Vocational Education in Republican China Henrike Rudolph,2022-05-13

This book offers a new perspective on the transnational dimensions of China s educational and economic history by focusing on Sino German interactions in the field of vocational education It explores how Chinese perceptions of manual work vocational skills and educational practices changed dramatically throughout the first half of the twentieth century as Chinese educators increased their efforts to study and translate German pedagogical writings Case studies researched in this book illustrate

how a Chinese appreciation for German technological and scientific advances and German interests in profiting from a growing Chinese economy are not just recent phenomena but have their roots in the early twentieth century *News from Germany* Heidi J. S. Tworek, 2019-03-11 Winner of the Barclay Book Prize German Studies Association Winner of the Gomory Prize in Business History American Historical Association and the Alfred P Sloan Foundation Winner of the Fraenkel Prize Wiener Library for the Study of Holocaust and Genocide Honorable Mention European Studies Book Award Council for European Studies To control information is to control the world This innovative history reveals how across two devastating wars Germany attempted to build a powerful communication empire and how the Nazis manipulated the news to rise to dominance in Europe and further their global agenda Information warfare may seem like a new feature of our contemporary digital world But it was just as crucial a century ago when the great powers competed to control and expand their empires In *News from Germany* Heidi Tworek uncovers how Germans fought to regulate information at home and used the innovation of wireless technology to magnify their power abroad Tworek reveals how for nearly fifty years across three different political regimes Germany tried to control world communications and nearly succeeded From the turn of the twentieth century German political and business elites worried that their British and French rivals dominated global news networks Many Germans even blamed foreign media for Germany's defeat in World War I The key to the British and French advantage was their news agencies companies whose power over the content and distribution of news was arguably greater than that wielded by Google or Facebook today Communications networks became a crucial battleground for interwar domestic democracy and international influence everywhere from Latin America to East Asia Imperial leaders and their Weimar and Nazi successors nurtured wireless technology to make news from Germany a major source of information across the globe The Nazi mastery of global propaganda by the 1930s was built on decades of Germany's obsession with the news *News from Germany* is not a story about Germany alone It reveals how news became a form of international power and how communications changed the course of history

Whispering the Techniques of Language: An Mental Journey through **Germany A Modern History**

In a digitally-driven earth wherever monitors reign great and immediate transmission drowns out the subtleties of language, the profound strategies and psychological nuances hidden within phrases often go unheard.
