those mighty wastes where forced to trust to his own resources man necessarily became independent and was secure from the corruption incidental to crowded communities These wild forests also attached an idea of the marvellous so novel to the Romans to the character of the German who trained to war by the habits of the chase associated piety with ferocity and would still listen to the secret voice of Nature in the mysterious whisperings of the forest now disposing him to deep musings now creating strange forebodings which were recognised as true prophetic inspiration in the women and maidens About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Science in Nineteenth-Century Germany Johannes Zachhuber,2013-10-03 This study describes the origin development and crisis of the German nineteenth century project of theology as science Its narrative is focused on the two predominant theological schools during this period the Tbingen School and the Ritschl School Their work emerges as a grand attempt to synthesize historical and systematic theology within the twin paradigms of historicism and German Idealism Engaging in detail with the theological historical and philosophical scholarship of the story s protagonists Johannes Zachhuber reconstructs the basis of this scholarship as a deep belief in the eventual unity of human knowledge This idealism clashed with the historicist principles underlying much of the scholars actual research The tension between these paradigms ran through the entire period and ultimately led to the disintegration of the project at the end of the century Drawing on a wealth of primary sources many of which have never been used in English speaking scholarship before Zachhuber embeds the essentially theological story he presents within broader intellectual developments in nineteenth century Germany In spite of its eventual failure the project of theology as science in nineteenth century Germany is here described as a paradigmatic intellectual endeavour of European modernity with far reaching significance beyond the confines of a single academic discipline *Library of the World's Best Literature, Ancient and Modern: Synopses of noted books.
