moral experience of health professionals that explains the discontinuities between the demands of bioethics and the experience and perceptions of health professionals and that enables the articulation of a full theory of clinical ethics with clinicians themselves as the foundation Against that background the first of three chapters on professional education presents a general framework for teaching clinical ethics the second discusses how to integrate ethics into formal health care curricula and the third addresses the opportunities for teaching available in clinical settings The final chapter Empowering Clinicians brings together the various dimensions of the argument and anticipates potential questions about the framework developed in earlier chapters
