Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald's menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental Food in Time and Place Paul Freedman, Joyce E. P. Kulshrestha, Felipe Fernández-Armesto, 2001 The story of food is cultural as well as culinary The history of how we produce process prepare and eat it encompasses ecology as well as gastronomy In this book the history is global It ranges over half a million years but Felipe Fernandez Armesto always makes it contemporary tracing it back from current food trends and food chains tastes and anxieties BOOK JACKET Cuisine and Culture Linda Civitello, 2011-03-29 Cuisine and Culture presents a multicultural and multiethnic approach that draws connections between major historical events and how and why these events affected and defined the culinary traditions of different societies Witty and engaging Civitello shows how history has shaped our diet and how food has affected history Prehistoric societies are explored all the way to present day issues such as genetically modified foods and the rise of celebrity chefs Civitello s humorous tone and deep knowledge are the perfect antidote to the usual scholarly and academic treatment of this universally important subject Food Jean-Louis Flandrin, Massimo Montanari, 2013-05-21 Food and drink Eatina History Andrew F. Food History Sylvie Vabre, Martin Bruegel, Peter J. Atkins, 2021-05-17 This pioneering book elevates the senses to a central role in the study of food history because the traditional focus upon food types quantities and nutritional values is incomplete without some recognition of smell touch sight hearing and taste Eating is a sensual experience Every day and at

every meal the senses of smell touch sight hearing and taste are engaged in the acts of preparation and consumption And yet these bodily acts are ephemeral their imprint upon the source material of history is vestigial Hitherto historians have shown little interest in the senses beyond taste and this book fills that research gap Four dimensions are treated Words Symbols and Uses Describing the Senses an investigation of how specific vocabularies for food are developed Industrializing the Senses an analysis of the fundamental change in the sensory qualities of foods under the pressure of industrialization and economic forces outside the control of the household and the artisan producer Nationhood and the Senses an exploration of how the combination of the senses and food play into how nations saw themselves and how food was a signature of how political ideologies played out in practical everyday terms Food Senses and Globalization an examination of links between food the senses and the idea of international significance Putting all of the senses on the agenda of food history for the first time this is the ideal volume for scholars of food history food studies and food culture as well as social and cultural historians Putting all of the senses on the agenda of food history for the first time this is the ideal volume for scholars of food history food studies and food culture as well as social and cultural historians The Story of Food DK,2018-05-01 From the fish that started a war to the pope poisoned with chocolate discover the fascinating stories behind the origins traditions and uses of our food Explore the tales symbolism and traditions that come wrapped up in the food on our plates food that not only feeds our bodies but also makes up our culture The Story of Food is a sumptuously illustrated exploration of our millennia old relationship with nearly 200 foods A true celebration of food in all its forms this book explores the early efforts of humans in their quest for sustenance through the stories of individual foods Covering all food types including nuts and grains fruit and vegetables meat and fish and herbs and spices this fascinating reference provides the facts on all aspects of a food s history Discover how foods have become a part of our culture from their origins and how they are eaten to their place in world cuisine todav The Cambridge World History of Food Kenneth F. Kiple, Kriemhild Coneè Ornelas, 2000 A two volume set which traces the history of food and nutrition from the beginning of human life on earth through the present Writing Food History Kyri W. Claflin, Peter Scholliers, 2013-08-01 The vibrant interest in food studies among both academics and amateurs has made food history an exciting field of investigation Taking stock of three decades of groundbreaking multidisciplinary research the book examines two broad questions What has history contributed to the development of food studies How have other disciplines sociology anthropology literary criticism science art history influenced writing on food history in terms of approach methodology controversies and knowledge of past foodways Essays by twelve prominent scholars provide a compendium of global and multicultural answers to these questions The contributors critically assess food history writing in the United States Africa Mexico and the Spanish Diaspora India the Ottoman Empire the Far East China Japan and Korea Europe Jewish communities and the Middle East Several historical eras are covered the Ancient World the Middle Ages Early Modern Europe and the Modern day The book is a unique addition to the growing literature on food
