Bunte,2019-01-29 Credit is the lifeblood of capitalism and development Brazil Russia India and China also called BRICs have become important creditors to developing countries However how will their loans affect economic development and democracy in recipient countries We need to understand why governments accept Chinese over Western loan offers before we can predict their likely consequences In *Raise the Debt* Jonas B Bunte systematically explains how governments choose among competing loan offers Using statistical analyses and extensive interview data he shows that the strings attached to loans vary across creditors Consequently one domestic interest group may benefit from Chinese credit but not U S loans while the opposite is the case for other groups Bunte provides evidence that governments cater to whichever domestic interest group is politically dominant when deciding between competing loan offers Combining a comparative politics approach with international political economy methods *Raise the Debt* shows how a deeper understanding of governments borrowing decisions is critical for gaining insights into how these loans could impact growth and democracy on a global scale **HMSO Agency Catalogue 1992** Great Britain.
