Europe's Green Revolution and Others Since Jonathan Harwood, 2012-05-04 How best to foster agricultural development in the Third World has long been a subject of debate and from a European perspective the persistent failure to design peasant friendly technology is puzzling From the late 19th century for example various western European countries also underwent green revolutions in which systematic attempts were made to promote the adoption of technological innovation by peasant farmers This book focuses on the development of public sector plant breeding in Germany from the late nineteenth century through its fate under National Socialism Harwood uses this historical case study in order to argue that peasant friendly research has an important role to play in future Green Revolutions , **Contesting Africa's New**

Green Revolution Jacqueline A. Ignatova, 2021-05-20 Genetically modified crops have become a key element of development strategies across the Global South despite remaining deeply controversial Proponents hail them as an example of pro poor innovation while critics regard them as a threat to food sovereignty and the environment The promotion of biotechnology is an integral part of new Green Revolution for Africa interventions and is also intimately linked to the rise of philanthrocapitalism which advances business solutions to address the problem of poverty Through interviews with farmers policymakers and agricultural scientists Jacqueline Ignatova shows how efforts to transform the seed sector in northern Ghana one of the key laboratories of this new Green Revolution may serve to exacerbate the inequality it was notionally intended to address But she also argues that its effects in Ghana have been far more complex than either side of the debate has acknowledged with local farmers proving adept at blending traditional and modern agricultural methods that subvert the interests of global agribusiness *Hope's Edge* Frances Moore Lappe, Anna Lappe, 2003-04-28 Journey to five continents and see the world of sustainability and conscious eating with new eyes featuring 100 pages of plant based recipes to better nurture ourselves and the planet Thirty years ago Frances Moore Lapp started a revolution in the way Americans think about food and hunger Now Frances and her daughter Anna pick up where Diet for a Small Planet left off Together they set out on an around the world journey to explore the greatest challenges we face in the new millennium Traveling to Asia Africa Latin America and Europe they discovered answers to one of the most urgent issues of our time whether we can transcend the

Industrial Ecology and Spaces of Innovation K. Green, 2006-01-01 This is an especially timely book Carefully organized and well motivated its power lies in the explicit effort to ask how industrial ecology and innovation studies do can and should intersect Reid Lifset Yale School of Forestry and Environmental Studies and editor Journal of Industrial Ecology This book explores the disciplinary interfaces and practical implications of working across the two disciplines of industrial ecology IE and innovation studies IS Both disciplines have something to say about instigating environmental improvement and more sustainable futures IE is predicated on the idea that social and economic systems mirror or should be made to

mirror natural ecological systems Proponents of IE devise models and techniques to trace material and energy resource flows as they move through social and economic systems They propose policy and management improvements to increase the resource efficiency of such systems By contrast IS researchers work with the idea that innovation is a dynamic activity vital to social and economic change and is shaped by a range of actors in industry in government and in households The authors illustrate the conceptual and practical problems and opportunities of working across this bi disciplinary interface with case studies presented from each and from hybrid perspectives that draw on both These include applied examples from IE such as an evaluation of industrial symbiosis in the UK and from working projects in industrialising countries Cases that originate with IS cover the areas of food construction and waste incineration New directions for conceptual development and further research are also offered Conceptual blindspots and research gaps are identified at the interface of the two disciplines Industrial Ecology and Spaces of Innovation will appeal to a wide and interdisciplinary audience including academics and researchers of environmental innovation management and economics industrial ecology and schools of environmental engineering Business environmental practitioners consultants and managers working with techniques such as life cycle analysis environmental impact assessment and collaborative industrial symbiosis initiatives will also find much to engage them within this book

Down to Earth Theodore Steinberg,2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative Now in a new edition Down to Earth reenvisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good he reminds readers that many critical episodes in U S history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities
