Culture in Law and Development Lan Cao,2016 The growth of international law in the post World War II era stemmed partly from the belief that universal norms would make life for the entire world s population safer more equitable and more conducive to each person s acquisition of basic material needs Starting in the sixties and seventies some scholars and activists challenged this assumption and established the school of cultural relativism a model that pays deference to local cultural traditions and favors them over international human rights norms Scholars tried to create and practice a middle ground approach between universalism and relativism whereby the most egregious violations would be prevented through assimilating only jus cogens norms into indigenous groups existing cultural traditions Such efforts at combining a few select international norms with local cultural traditions largely failed

Culture in Law and Development presents a provocative new solution to the seemingly intractable problem of combining international norms with local cultural traditions by changing culture through law and development In this book Lan Cao demonstrates how the gradual expansion of customary international law CIL provides a model for changing culture in ways that protect and advance local populations The book adopts a holistic view of development and argues that cultural norms that impede the human capabilities of the poor women and other marginal groups should be changed The book reveals how a more conscious coordinated effort on such change can succeed while non violative local traditions are otherwise honored and preserved Cao proposes that cultural change does not have to constitute cultural disrespect and that local societies only benefit by a careful

combination of externally wrought change and internally fostered tradition *Sport and Women* Gertrud Pfister, Ilse Hartmann-Tews, 2005-07-26 Although female athletes are successful in all types of sport in many countries sport is still a male domain This book examines and compares the sporting experiences of women from different countries around the world and offers the first systematic and cross cultural analysis of the topic of women in sport Sport and Women presents a wealth of new research data including in depth case studies of 16 countries in North and South America Asia Eastern and Western Europe and Africa In addition the book offers comparative assessments of the extent to which women are represented in global sport and the opportunities that women have to participate in decision making processes in sport The book illuminates a wide range of key international issues in women s sport such as cultural barriers to participation and the efficacy of political action It is therefore essential reading for anybody with an interest in the sociology culture and politics of sport
