For A Future To Be Possible:

For a Future to Be Possible Thich Nhat Hanh, 2008-10-21 THE FIVE MINDFULNESS TRAININGS are the basic statement of ethics and morality in Buddhism In For a Future to Be Possible Zen Master and peace activist Thich Nhat Hanh discusses these Five Mindfulness Trainings and offers insights and challenges for how they might play an important role in our personal lives and in society Nhat Hanh calls the Soviet Defense Against Operation Barbarossa: A Possible Model For Future Soviet Defensive Doctrine Major Terry B. Wilson, 2015-11-06 This monograph examines the historic attack by Adolf Hitler s Germany against the Soviet defenses in 1941 It examines actions of both armed forces to analyze what went wrong and what went right for each side It focuses on Soviet defenses to determine the usefulness of defensive planning and operations of 1941 to today s announced policy of reasonable sufficiency and non offensive defense The monograph begins with an analysis of current Soviet military doctrine and President Gorbachev s stated political ideal of reasonable sufficiency and his goal for the military of a doctrine of non offensive defense The monograph continues with an examination of Soviet military theory an historical analysis of Operation Barbarossa and an analysis of the usefulness of the campaign for modern doctrinal development The Soviets use historical models in the scientific development of their doctrine The Future of Equality Shlomi Segall, 2025-05-15 Philosophers have been preoccupied with the future from time immemorial But for egalitarians the future of humanity constitutes a relatively new challenge The premise of this book is that a complaint based ideal of egalitarianism faces problems when applied to the future For one thing if we suppose that future people are destined to fare better than us say in terms of overall wellbeing then allowing humanity to flourish would then represent a net increase in terms of egalitarian complaints With respect to equality at least it would be better to refrain from bringing new life into being That seems absurd This is the Anti Natalist objection to egalitarianism Second any policy aimed at reducing future inequalities and indeed any population policy at large will in all likelihood affect the identity of those who will be born This familiar Non Identity problem poses unique problems for egalitarianism especially ones of the complaint model Arguably a person cannot have a complaint about being worse off than another when the only other alternative distribution is one in which she does not exist Put differently such a person lacks a standing to complain about this future inequality This can be referred to as the Non Identity objection or as the Standing objection to egalitarianism This book examines how to evaluate different scenarios for humanity s future from an egalitarian perspective It is argued that planning for the future does require egalitarian considerations but that egalitarianism also needs to be adapted to handle future persons As indicated a key challenge concerns how to evaluate mixed populations containing both necessary and possible persons The book proposes a pluralist approach combining egalitarianism with prioritarianism Prioritarianism itself also suffers unique problems when applied to the future chief among them the Separateness of Persons objection The book attempts to deflect these obstacles and aims to develop a coherent framework that maintains egalitarian principles while appropriately

discounting the status of merely possible people Overall the book seeks to advance both our ethical assessment of humanity's future and our understanding of the nature of equality and distributive ethics more generally

Living for the Future

Rachel Muers, 2008-10-01 Our relationship to future generations raises fundamental issues for ethical thought to which a Christian theological response is both possible and significant A relationship to future generations is implicitly central to many of today's most public controversies over environmental protection genetic research and the purpose of education to name but a few but it has received little explicit or extended consideration In *Living for the Future* Rachel Muers argues and seeks to demonstrate that to consider future generations as ethically significant is not simply to extend an existing ethical framework but to rethink how ethics is done Doing intergenerationally responsible theology and ethics means paying attention to how people are formed as theological and ethical reasoners about the good how social practices of deliberation about the good are maintained and developed and how all of this relates to an understanding of the world as the sphere of God's transforming action In other words an intergenerationally responsible theological ethics will pay attention to the ethics and the spirituality of ethics itself Her account of the ethical relation to future generations centres on three key concepts choosing life see Deut 30:19 keeping the sources open and sustaining fruitful contexts These concepts are developed theologically and in engagement with extra theological conversations on intergenerational responsibility She shows how they take up and move beyond concerns expressed in those conversations for survival for the right distribution of resources and for the maintenance of human values

Institutions For Future Generations

Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice It should also press us to provide institutional design proposals to change the decision making world that surrounds us This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences It provides citizens activists firms charities public authorities policy analysts students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today's excessive short termism
