The Gift Economy David Cheal,2015-07-03 Until recently we have known more about gift giving practices in pre industrial societies than about those of industrial western society In this book first published in 1988 David Cheal shows that the process of present giving and receiving is a vital element in contemporary social life relevant to some of the most important theoretical traditions in sociology particularly those of Durkheim and Weber and to the social constructionism of Peter Berger and Thomas Luckmann This volume is the result of a major study of gift rituals carried out by David Cheal and his associates in which general themes are richly illustrated with details from

individual case histories gathered during the research It is highly significant that in western society women are more active gift givers than men and while their voices explain how emotions and interests are interrelated within the gift economy the author shows how that in turn is related to current theories about family gender and religion
