Effective Sexual Health Interventions Issues In Experimental Evaluation:

Effective Sexual Health Interventions Judith M. Stephenson, Chris Bonell, John Imrie, 2003 This text provides an analysis of the methodological and practical issues involved in evaluating sexual health interventions It should appeal to trial enthusiasts through discussion of specific issues in trial design and also to those with a sceptical interest in the potential of experimentation **Sexual Health: a Public Health Perspective** Kaye Wellings, Kirstin Mitchell, Martine Collumbien, 2012-10-16 This timely book introduces social aspects of the study of sexual health and their application to public health practice The book addresses five key themes Conceptual and theoretical aspects of sexual health Sexual health outcomes of Risk and Vulnerability Improving sexual health status and Measuring and assessing sexual health status The authors consider each of these themes within their cultural and historical context and illustrate topics with international examples and case studies Key features of the book include A spotlight on populations rather than individuals and a focus on the prevention of ill health and promotion of well being A global perspective the book makes the distinction between developing and developed countries but recognises that inequalities are to be found within as well as between countries A view of sexual behaviour as socially learned rather than biologically given and so as amenable to change and intervention to improve sexual health status An emphasis on ways in which risk and vulnerability are products not only of individual behaviours but of the social context in which they are practiced Written by authors with a wide range of experience this book will be a valuable resource for public health practitioners and those studying and working in the area of sexual health Understanding Public Health is an innovative series published by Open University Press in collaboration with the London School of Hygiene Tropical Medicine Series Editors Ros Plowman and Nicki Thorogood Contributors Sevgi O Aral Chris Bonell Helen Burchett Joanna Busza Martine Collumbien Simon Forrest Rebecca French Claudia Garcia Moreno Anna Glasier Jami Leichter Kirstin Mitchell Will Nutland Thomas Peterman Elisabeth Pisani Kaye Wellings Meg Wiggins and Maria Zuurmond ***Handbook of Health Research Methods: Investigation, Measurement and Analysis*** Ann Bowling, Shah Ebrahim, 2005-06-16 an ideal set text Angela Scriven Course Leader Brunel University Which research method should I use to evaluate services How do I design a questionnaire How do I conduct a systematic review of research This handbook helps researchers to plan carry out and analyse health research and evaluate the quality of research studies The book takes a multidisciplinary approach to enable researchers from different disciplines to work side by side in the investigation of population health the evaluation of health care and in health care delivery Handbook of Health Research Methods is an essential tool for researchers and postgraduate students taking masters courses or undertaking doctoral programmes in health services evaluation health sciences health management public health nursing sociology socio biology medicine and epidemiology However the book also appeals to health professionals who wish to broaden their knowledge of research methods in order to make effective policy and practice decisions Contributors Joy Adamson Geraldine Barrett Jane P

J. Melendez-Torres, Emily

Warren, 2024-02-15 This book describes an innovative approach to the evaluation of complex health interventions assessing what interventions work how and for whom Rejecting the stalemate between trials and realist evaluation it draws on the best of both Randomised controlled trials and systematic reviews offer the least biased means of assessing intervention effects but tell us little scientifically about how interventions work Policy makers and practitioners are also not supported to decide which interventions are likely to achieve most benefits in their local contexts Realists use other forms of evaluation and evidence synthesis exploring how intervention mechanisms interact with context to generate outcomes But these approaches lack rigour in assessing causality This book proposes how realist evaluation methods may be incorporated within randomised controlled trials and systematic reviews This enables evaluations and evidence synthesis to benefit from the more nuanced questions posed within realist enquiry while maintaining rigour in assessing causality Promoting Young People's Sexual Health Roger Ingham, Peter Aggleton, 2006-09-27 Valuable contributions on different aspects of sexual and reproductive health among young people are presented in this book with a focus on developing country contexts Key discussions on issues relating to young people and their sexual activities are brought together in one volume exploring how these issues are affected by the wider contexts in which they live The interdisciplinary team of contributors examine the practical and ideological barriers that inhibit progress in the development of educational and service level improvement of young people's sexual health as well as presenting examples of efforts made to overcome such difficulties Promoting Young People's Sexual Health looks to the future proposing ways forward in terms of policy and legislative changes necessary for long term improvements in young people's sexual health *Health Promotion in Practice* Sherri Sheinfeld Gorin, Joan
