The Soul's Code James Hillman, 2017-08-01 An acute and powerful vision offers a renaissance of humane values Thomas Moore author of *Care of the Soul* and *The Re Enchantment of Everyday Life* Plato called it daimon the Romans genius the Christians guardian angel today we use such terms as heart spirit and soul While philosophers and psychologists from Plato to Jung have studied and debated the fundamental essence of our individuality our modern culture refuses to accept that a unique soul guides each of us from birth shaping the course of our lives In this extraordinary bestseller James Hillman presents a brilliant vision of our selves and an exciting approach to the mystery at the center of every life that asks What is it in my heart that I must do be and have And why Drawing on the biographies of figures such as Ella Fitzgerald and Mohandas K Gandhi Hillman argues that character is fate that there is more to each individual than can be explained by genetics and environment The result is a reasoned and powerful road map to understanding our true nature and discovering an eye opening array of choices from the way we raise our children to our career paths to our social and personal commitments to achieving excellence in our time Praise for *The Soul's Code* Champions a glorious sort of rugged individualism that with the help of an inner daimon or guardian angel can triumph against all odds The Washington Post Book World A brilliant absorbing work Hillman dares us to believe that we are each meant to be here that we are needed by the world around us Publishers Weekly

Carl Jung and Maximus the Confessor on Psychic Development G. C. Tympas,2014-03-26 In what ways does psychological development differ from spiritual development and psychological experience from spiritual experience Bringing together two disparate theories under a trans disciplinary framework G C Tympas presents a comparison of Carl Jung s theory of psychic development and Maximus the Confessor s model of spiritual progress An evolutionary relationship between the psychological and the spiritual is proposed for a dynamic interpretation of spiritual experience Carl Jung and Maximus the Confessor on Psychic Development offers a creative synthesis of elements and directions from both theories and further explores Jung s views on religion in a dialogue with Maximus concepts The different directions and goals of Jung s and Maximus models Jung s Answer to Job in relation to Maximus theory of final restoration Tympas argues that a synthesis of Jung s and Maximus models comprises a broader trans disciplinary paradigm of

development which can serve as a pluralistic framework for considering the composite psycho spiritual development Constructively combining strands of differing disciplines this book will appeal to those looking to explore the dialogue between analytical psychology early Christian theology and Greek philosophy **Metacognition, Metahumanities, and Medical Education** Alan Bleakley, Quentin Eichbaum, Rachel Ellaway, 2024-09-30 This persuasive volume develops a novel approach to medical education and the medical humanities making a case for the integration of the two to explore the ways in which warm humanism and cold technologies can come together to design humane posthumanist futures in medicine There are many problems with conventional medical education It can be overly technocratic dehumanizing and empathy eroding introducing artefacts that lead to harm and reproduce inequality and injustice Use of the arts humanities and qualitative social sciences have been pursued as an antidote or balance to these problems Arguing against the purely instrumentalist use of medical humanities in this way this book addresses the importance of a genuine and open ended engagement with humanities approaches in medicine It discusses the impact of artificial intelligence and emerging theoretical frameworks and posthumanist perspectives such as object oriented ontology on meaning making in medicine It demonstrates how the key to such a transition is the recovery of the intrinsic art and humanity of metaphor heavy biomedical science in turn framed by models of dynamic complexity rather than static linearity This book is an important contribution to debates around the medical humanities and its role in medical education It is an essential read for scholars with an interest in these areas as well as those working in science and technology studies and the sociology of health and illness **The Soul of Beauty** Ronald Schenk, 1992 The problem explored in The Soul of Beauty is the split in modern consciousness between the world of perception and appearance on the one hand and the world of action and meaning on the other We see in one way and find truth in another The work presents this dualism as a problem in the modern sense of beauty The intent of the book is the recovery of beauty as that which brings together such contemporary splits as perception and action appearance and meaning matter and spirit subject and object Beauty is imaged in two paradigms The first presents beauty as a matter of appearance which holds meaning beauty as truth The second holds that beauty is subjective experience which in its modern sense is divorced from knowledge and practical action beauty as relative experience The paradigms are formed through an imaginative and historical exploration of the tradition of beauty in Western consciousness The prototype of the first paradigm beauty as appearance is seen in the goddess Aphrodite who reflects the Greek sense of divinity in form itself This paradigm is then founded upon the tradition of Plato in the Phaedrus and the Symposium Plotinus Dionysius and Ficino The major elements of this paradigm are depicted in beauty as 1 source in a hierarchical universe 2 universal mediator 3 object of love 4 human perception 5 human knowledge 6 light and 7 unity goodness and being The suggestion is made that the paradigm of beauty as appearance is relevant for psychology as a study of soul because it brings together perception and meaning The paradigm of beauty as a subjective experience focuses historically upon beauty as a spiritual conceptual

proportion methodological linear perspective and subjective phenomenon In the tradition of proportion and subjectivism knowledge is gained through perception that occurs via an organizing system such as mathematics or a concept such as proportion rather than through the direct perception of appearance Meaning is separated from perception and the organizing system or concept not appearance becomes the ground of knowledge It is suggested that this paradigm reflected in scientific and conceptual psychology is problematic for psychology as a study of soul Instead psychology conducts its endeavors in the service of identification with the divine control over the physical world and certainty of consciousness The final portion of the work examines the recovery of beauty as appearance in contemporary psychology through the notion of image in Jung's later thought and the phenomenon of psychotherapy The work concludes with a presentation of psychology as an aesthetic enterprise bringing together meaning and appearance spirit and matter art and science subject and object
