Teaching Latin: Contexts, Theories, Practices Steven Hunt, 2022-03-10 Building on and updating some of the issues addressed in *Starting to Teach Latin*, Steven Hunt provides a guide for novice and more experienced teachers of Latin in schools and colleges who work with adapted and original Latin prose texts from beginners to advanced levels. It draws extensively on up-to-date theories of second language development and on multiple examples of the practices of real teachers and students. Hunt starts with a detailed look at deductive, inductive, and active teaching methods which support teachers in making the best choices for their students' needs and for their own personal preferences, but goes on to organise the book around the principles of listening, reading, speaking, and writing Latin. It is designed to be informative, experimental, and occasionally provocative. The book closes with two chapters of particular contemporary interest: Access, Diversity, and Inclusion investigates how the subject community is meeting the challenge of teaching Latin more equitably in today's schools; and The Future offers some thoughts on lessons that have been learnt from the experiences of online teaching practices during the Covid-19 lockdowns. Practical examples, extensive references, and a companion website at www.stevenhuntclassics.com are included. Teachers of Latin will find this book an invaluable tool inside and outside of the classroom.
