**Urogenital Trauma: A Practical Guide** Said Abdallah AL-Mamari, 2023-12-30 This book is written in a unique style that

immediately catches the reader's interest and takes him on an enjoyable and fruitful journey from the kidneys to the male genital organs. Throughout the chapters, the researchers, the practitioners and the junior doctors under urological training are offered a rare opportunity to rapidly refresh their knowledge with updated information starting from the mythical and historical conception of the involved organ, its embryology and anatomy and progressing to the epidemiology, etiology, anatomopathology, mechanism, treatment and prognosis of its trauma. It aims to provide the reader with the most complete and practical information possible and includes an abundant and well-selected illustration to help the learning process. A special section on male genital self-mutilations is added at the end of the book as the icing on the cake, treating this phenomenon systematically with a harmonious marriage between mythology, history and a comprehensive literature review and management strategies. This manual has been reviewed and recommended by an internationally renowned expert in urogenital trauma and reconstructive surgery and is a very useful vade mecum for every Practitioner or resident in Urology.

**A Practical Guide to Comprehensive Stroke Care** Lalit Kalra, Charles David Alexander Wolfe, Anthony Rudd, 2010-12-28  
Written for health professionals and managers involved in the planning or provision of stroke care, this book provides a comprehensive state-of-the-art overview of the evidence and practices that underpin high-quality stroke care. It sets the scene by describing the epidemiology, trends and needs of stroke patients, followed by chapters on the prevention of stroke, investigation and management of TIAs, transient ischaemic attack, early management and thrombolysis, clinical management of acute stroke patients and rehabilitation. Each chapter is thematically linked and provides a complete up-to-date review of evidence, its implications for clinical practice, proven multidisciplinary models of delivering high-quality care, organisation of services for greatest impact within cost constraints and emerging areas for future management of stroke patients. This book is unique as it covers areas such as palliative and end-of-life care for stroke patients, planning and provision of stroke services, benchmarking for quality of services and management of stroke patients in community settings. It will be a unique resource for anyone caring for stroke patients regardless of discipline or level of expertise and provides a quick and friendly compendium of evidence, good practice and practical hints on organising care.
