**Photography, History, Difference** Tanya Sheehan, 2014-12-02 Over the past decade historical studies of photography have embraced a variety of cultural and disciplinary approaches to the medium while shedding light on non Western vernacular and other photographic practices outside the Euro American canon Photography History Difference brings together an international group of scholars to reflect on contemporary efforts to take a different approach to photography and its histories What are the benefits and challenges of writing a consolidated global history of photography How do they compare with those of producing more circumscribed regional or thematic histories In what ways does the recent emphasis on geographic and national specificity encourage or exclude attention to other forms of difference such as race class gender and sexuality Do studies of other photographs ultimately necessitate the adoption of nontraditional methodologies or are there contexts in which such differentiation can be intellectually unproductive and politically suspect The contributors to the volume explore these and other questions through historical case studies interpretive surveys of recent historiography criticism and museum practices and creative proposals to rethink the connections between photography history and difference A thought provoking collection of essays that represents new ways of thinking about photography and its histories It will appeal to a broad

readership among those interested in art history visual culture media studies and social history

**Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson,2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography s arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time      Photographers Peter E. Palmquist,2000      **Photography in Colonial Australia** Robert Holden,1988 Photography in Colonial Australia examines the Australian books of the nineteenth century that use original photographs as a means of illustration For the first time in Australia Robert Holden has assessed the importance of photographically illustrated books Part One of Photography in Colonial Australia is an historical survey looking at issues like colonisation through photography and whether it was a nineteenth century photographer s role to create images like an artist or to accurately recreate the image before the camera s eye like a mirror Part Two of the work focuses on a range of photographic genres specifically royalty Aborigines exploration and travel science varia and art Any person with an interest in photography nineteenth century social history illustrated books or bibliography will find this work an invaluable reference Sixty five photographic illustrations and a full bibliography of 130 items makes Photography in Colonial Australia the standard cited source and this important text is further enhanced by an extensive index of photographers and publishers This pioneering work by Robert Holden which details 130 publications issued in Australia before 1900 will place one country s publishing curiosities in an international context from the foreword by Lucien Goldschmidt world authority on

Henkes,2012-12-06 The 1973 postgraduate courses in ophthalmology held under the auspices of the Netherlands Ophthalmological Society mark the 25th anniversary of the rebuilt Rotterdam Eye Clinic The themes set for these courses Ophthalmic Photography Electro ophthalmology and Echo ophthalmology have been chosen from a multitude of rapid

developments in ophthalmology during this period The aim was to provide the clinician with a lead in a bewildering field of apparatus and techniques and to help him in selecting methods that provide useful results without too much specialised knowledge However sophisticated techniques and discussion of results have been added now and then so that the more advanced reader still finds sufficiently interesting material in this report This holds e g for the section on fluorescence angiography which section has been extended on the basis of the probability that the clinician in general practice too has been or will be confronted with this rapidly expanding and fascinating field The reason to bring together two methods of objective examination of visual functions i e electro ophthalmology and echo ophthalmology is clearly due to the intimate connection between the two In many ways these methods complement each other in providing the final diagnosis This report does not intend to replace text books nor to outdate treatises on superspecialised ophthalmic subjects it simply tends to provide the clinician with a basic information on selected techniques stimulating the reader to start using them in daily practice
