Technologies in the Ceramic and Nuclear Industries IX John D. Vienna, Dane R. Spearing, 2012-04-05 In today's world of increasingly stringent environmental regulations it is critical to identify and adequately address environmental issues in the ceramic industry to ensure success. In addition, ceramics and glasses play a critical role in the nuclear industry. Nuclear fuels and waste forms for low level and high level radioactive mixed and hazardous wastes are primarily either ceramic or glass. Effective and responsible environmental stewardship is becoming increasingly more important in the world. These proceedings detail the results of the ongoing effort in these areas. Proceedings of the symposium held at the 105th Annual Meeting of The American Ceramic Society, April 27-30 in Nashville, Tennessee. Ceramic Transactions Volume 155.
