Extraordinary People Redefining The Idiot Savant:

The Acorn Principle Jim Cathcart, 2025-06-25 Self awareness knowing your nature your abilities and how you react to people and situations may well be the greatest life management skill you can have The Acorn Principle is a guide to doing a complete life checkup that will help you pinpoint your talents and strengths Nurturing those strengths is the key to the success you've always wanted but didn't know how to attain By reading this book and doing the simple exercises you'll learn things about yourself that you and most people don't even suspect You will learn Why some people attract you and others repel you How to predict your instinctive reactions to various situations to understand what circumstances you thrive in and why Where your intellectual blind spots are Why you like and dislike certain things and how to use that knowledge to motivate yourself Who are the most influential people in your life and how to connect with them and others more effectively How to control your simple daily actions in such a way that you develop new abilities and continually grow a better life The potential to live the life of your dreams exists within you The more you explore your talents your relationships and the patterns in your life the more readily you will be able to tap into those potentials A more fulfilling and meaningful life is possible for you without changing your nature it will come from discovering who you already are The mighty oak sleeps within you right now

The Mind of the Mathematician Michael Fitzgerald, Ioan James, 2007-07-16 An intriguing look at the psychology and personality of mathematicians with profiles of twenty prominent figures in the field What makes mathematicians tick How do their minds process formulas and concepts that for most of the rest of the world's population remain mysterious and beyond comprehension Is there a connection between mathematical creativity and mental illness In *The Mind of the Mathematician* internationally famous mathematician Ioan James and accomplished psychiatrist Michael Fitzgerald look at the complex world of mathematics and the mind Together they explore the behavior and personality traits that tend to fit the profile of a mathematician They discuss mathematics and the arts savants gender and mathematical ability and the impact of autism personality disorders and mood disorders These topics together with a succinct analysis of some of the great mathematical personalities of the past three centuries combine to form an eclectic and fascinating blend of story and scientific inquiry The authors' careful treatments are an especially welcome addition to a genre riddled with apocryphal anecdotes and shoddy scholarship Nature

Mathematical Reasoning Raymond Nickerson, 2011-02-25 The development of mathematical competence both by humans as a species over millennia and by individuals over their lifetimes is a fascinating aspect of human cognition This book explores when and why the rudiments of mathematical capability first appeared among human beings what its fundamental concepts are and how and why it has grown into the richly branching complex of specialties that it is today It discusses whether the truths of mathematics are discoveries or inventions and what prompts the emergence of concepts that appear to be descriptive of nothing in human experience Also covered is the role of esthetics in mathematics What exactly are mathematicians seeing when they describe a mathematical entity as beautiful There is

discussion of whether mathematical disability is distinguishable from a general cognitive deficit and whether the potential for mathematical reasoning is best developed through instruction This volume is unique in the vast range of psychological questions it covers as revealed in the work habits and products of numerous mathematicians It provides fascinating reading for researchers and students with an interest in cognition in general and mathematical cognition in particular Instructors of mathematics will also find the book's insights illuminating *Interaction in the Language Curriculum* Leo Van

Lier, 2014-06-03 *Interaction in the Language Curriculum* offers an innovative theory of language education integrating curriculum practice research and teaching It emphasises the interdependence of knowledge and values and stresses the central importance of learning as a social process Leo van Lier argues that moral as well as intellectual and practical principles must underlie curriculum development and everyday teaching captured in his triple focus on Awareness Autonomy and Authenticity In addition to its rich grounding in language education practice the book draws support for his position from diverse sources in sociology philosophy and cognitive science from the work of Bourdieu Giddens Wittgenstein Peirce Vygotsky Bakhtin and Dewey In the current broadening context of language education this study makes an important contribution to research It presents a coherent philosophical theory as well as considering practical issues in implementation of a new language curriculum As such it will be of great benefit to teachers applied linguists and educationalists generally

 Peake,2016-09-13 An eye opening response to Aldous Huxley s widely influential work on psychedelics physical reality and
 consciousness What exactly are hallucinations Are they actually doors to another reality Anthony Peake thinks so In this
 stunning book he takes Aldous Huxley s *The Doors of Perception* and updates it using the latest information from quantum

mechanics neurochemistry and consciousness studies Most human beings perceive the doors of perception as being securely closed But here Peake analyzes the concept of the scale of transcendence and suggests there is a scale of perceptions whereby the doors are slowly opened bit by bit to reveal the true nature of reality For normal people glimpses of this reality what the Gnostics called The Pleroma are experienced during noetic experiences However for others the doors are prized open by certain neurological processes starting with migraine and progressing through various altered states such as temporal lobe epilepsy bipolar syndrome autism and schizophrenia A pioneering work on the relationship between physical reality and consciousness Opening the Doors of Perception suggests that man can indeed perceive reality in its true glory
