extraterrestrials really exist whether they have evolved from simpler forms of life whether they have evolved intelligence and if so whether their modes of understanding the world are comparable to and congruent with our own The contributors to this volume cover these topics and also consider how we might communicate with aliens and whether we would be able to understand the alien messages we might receive Finally the authors who include distinguished scientists speculate whether the aliens might have a moral code and what might be our moral obligations in the event any extraterrestrials were ever discovered

Unknowability Nicholas Rescher, 2009-01-01 The realities of mankind's cognitive situation are such that our knowledge of the world's ways is bound to be imperfect None the less the theory of unknowability agnoseology as some have

called it is a rather underdeveloped branch of philosophy In this philosophically rich and groundbreaking work Nicholas Rescher aims to remedy this As the heart of the discussion is an examination of what Rescher identifies as the four prime reasons for the impracticability of cognitive access to certain facts about the world developmental unpredictability verificational surdity ontological detail and predicative vagrancy Rescher provides a detailed and illuminating account of the role of each of these factors in limiting human knowledge giving us an overall picture of the practical and theoretical limits to our capacity to know our world

[Contact with Alien Civilizations](#) Michael Michaud, 2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that's not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to find out how they are like us and how they are different Microorganisms don't have a lot to say There is another implication of contact that underlies this book Intelligent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have conscious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion
