How Asia Can Shape the World J. Ørstrøm Møller, 2011 Asia will redraw the map of economic progress over the next twenty five years Growth is necessary to solve economic and social problems but harder to achieve as the age of plenty gives way to the age of scarcities The challenge opens the doors for an Asian economic model based on shifting of productivity for

the individual to groups ecological productivity instead of economic productivity and a reversal to traditional Asian values less materialistic than Western values A new paradigm for economic thinking emerges to replace the one launched in the West 200 years ago Democratic Governance and European Integration Ronald Holzhaacker,Erik Albæk,2007-01-01 As the power and scope of the European Union moves further beyond traditional forms of international cooperation between sovereign states it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision making opinion formation interest intermediation national executive decision making and national parliamentary scrutiny From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system They conclude that more changes are seen within the state centric than in the societal centred processes of democracy thus the public seems to have been left behind in the process of constructing Europe The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union This book will be of great interest to academics and researchers of political science public policy and international relations as well as those interested in European studies and comparative politics *International Handbook of Public Management Reform* Shaun Goldfinch,Joe Wallis,2009-01-01 This volume presents a compelling package for anyone interested in public sector reform It effectively combines a wide range of well researched reviews of national experiences with state of the art thematic chapters in key reform areas such as IT governance public sector leadership and accountability The result is a robust insightful and sometimes sobering series of accounts of the promises and pitfalls of efforts to reform the institutions and practices of public governance around the world A must read Paul t Hart Australian National University This major Handbook provides a state of the art study of the recent history and future development of international public management reform Through a careful cross country analysis spanning the last three decades this timely volume critically evaluates whether countries are converging towards a single public management model The book goes on to investigate unresolved issues surrounding leadership e government accountability and computer systems failure currently facing reformers Shaun Goldfinch and Joe Wallis have brought together a number of eminent scholars from across Europe Asia North America and Australasia to explore the role of economic ideas human resources and the state of public management reform in twelve countries Providing a broad global overview of public management and facilitating a greater understanding of the difficult issue of reform this book will find widespread appeal amongst academics and postgraduate students of public administration as well as practitioners in the field Skrifter Universitetet i Bergen,1909 **Democracy in Scandinavia** David Arter,2006-09-19 This book is about the distinctive features of Scandinavian democracy the state of Scandinavian democracy and the

classification of the Scandinavian democracies It breaks new ground in challenging the established status of the Scandinavian countries as consensus model democracies The book poses three main questions First what are the distinctive features of the five Scandinavian political systems when compared with the Westminster model of democracy Next how well does the evidence from recent commissions suggest that Scandinavian democracy is working in practice Finally is Scandinavian democracy consensual majoritarian or mixed The nature of legislative executive relations is explored with a particular focus on the role of the parliamentary opposition and its involvement in policy making

The Political Class in Advanced Democracies Jens Borchert, Jürgen Zeiss, 2003-12-11 Professional politicians have increasingly come under public attack in most democratic countries Yet they have received surprisingly little systematic attention in political science This book demonstrates that there are both striking similarities between professional politicians in different countries and notable national peculiarities The introduction develops a common conceptual framework for the chapters to follow Using Mosca s term and Weber s seminal insights it reconstructs the concept of political class to grasp the degree of common interests shared by politicians of different parties and in different institutions Thereby it presents an innovative perspective on politicians The twenty country chapters written by scholars from sixteen countries both provide up to date information on professional politics in their countries and discuss the merits of the theoretical approach In doing so they follow a common format thus facilitating a comparative reading of particular aspects Each chapter looks at the historical process of professionalization the institutional context of professional politics the size of the political
