Knowledge Generation and

Technical Change Steven Wolf, David Zilberman, 2012-12-06 Knowledge generation and transfer mechanisms are being transformed in important and controversial ways Investment in research and development has increased in response to recognition that scientific productivity is tightly connected to economic dynamism Patent protection has been expanded in order to stimulate higher levels of private investment Intellectual property rights held by public organizations and researchers are now increasingly transferred to private organizations to accelerate the diffusion and enhance the value of knowledge produced by public agencies and universities Additionally new institutions such as university offices of technology transfer venture capital markets and a variety of consortia in knowledge intensive industries are being established throughout the United States and in other parts of the world These changes have led to a repositioning of the state in systems of innovation and an increase in the proprietary character of technical information The purpose of this book is to review and analyze i contemporary transitions in agricultural knowledge generation and extension arrangements from an empirical perspective and ii emerging and contradictory perspectives as to how knowledge systems can be assessed effectively The authors aim to provide the reader with a better understanding of the implications of new biotechnologies and new intellectual property rights regimes on public private relations in science the extent to which benefits from scientific knowledge are being appropriated by private sector actors the diversity and possible outcomes of privatization initiatives in extension and prospects for public goods production and ecological sustainability given contemporary trends The book presents contrasting views on the degree of complementarity and substitution between private and public sector investments in research and extension Recognizing that the labels public and private are incomplete and at times misleading descriptions of the structure and function of coordinating bodies in social systems the analyses highlight ways in which public and private spaces and modes of functioning combine In addition to illustrating a broad range of analytic methodologies useful for studying organizational questions in knowledge systems the authors identify the implications of a range of past and potential institutional innovations

Genetically Modified Pest-Protected Plants National Research Council, Board on Agriculture and Natural Resources, Committee on Genetically Modified Pest-Protected Plants, 2000-08-23 This book explores the risks and benefits of crops that are genetically modified for pest resistance the urgency of establishing an appropriate regulatory framework for these products and the importance of public understanding of the issues The committee critically reviews federal policies toward transgenic products the 1986 coordinated framework among the key federal agencies in the field and rules proposed by the Environmental Protection Agency for regulation of plant pesticides This book provides detailed analyses of Mechanisms and results of genetic engineering compared to conventional breeding for pest resistance Review of scientific issues associated with transgenic pest protected plants such as allergenicity impact on nontarget plants evolution

Biotechnology - The Science and the Business Derek G. Springham,Vivian Moses,Ronald E. Cape,2020-08-18

Biotechnology has not stood still since 1991 when the first edition of Biotechnology The Science and the Business was published It was the first book to treat the science and business of technology as an integrated subject and was well received by both students and business professionals All chapters in this second edition have been updated and revised and some new chapters have been introduced including one on the use of molecular genetic techniques in forensic science Experts in the field discuss a range of biotechnologies including pesticides the flavor and fragrance industry oil production fermentation and protein engineering On the business side subjects include managing financing and regulation of biotechnology Some knowledge of the science behind the technologies is assumed as well as a layperson's view of buying and selling As with the first edition it is expected that this book will be of interest to biotechnology undergraduates postgraduates and those working in the industry along with students of business economics intellectual property law and communications Biodiversity and Traditional Knowledge Sarah A Laird,2010-09-23 Biodiversity research and prospecting are long standing activities taking place in a new legal and ethical environment Following entry into force of the Convention on Biological Diversity in 1993 and other recent policy developments expectations and obligations for research and prospecting partnerships have changed However to date there are few guides to integrating these concepts with practice This book offers practical guidance on how to arrive at equitable biodiversity research and prospecting partnerships Drawing on experience and lessons learned from around the world it provides case studies analysis and recommendations in a range of areas that together form a new framework for creating equity in these partnerships They include researcher codes of ethics institutional policies community research agreements the design of more effective commercial partnerships and biodiversity prospecting contracts the drafting and implementation of national access and benefit sharing laws and institutional tools for the distribution of financial benefits As part of the People and Plants initiative to enhance the role of communities in efforts to conserve biodiversity and use natural resources sustainably Biodiversity and Traditional Knowledge will be invaluable to students researchers and local communities academic institutions international agencies government bodies and companies involved in biodiversity research prospecting and conservation *The Commercialization of Genetic Research* Timothy A. Caulfield,Bryn Williams-Jones,1999-12-31 The rapid advances made in genetic research and technology over the last few decades have led to a host of important discoveries that have allowed for the detection and hopefully soon the treatment of a number of genetic conditions and diseases Not surprisingly these advances have also raised numerous ethical concerns about how resulting technologies will be implemented and the impact they will have on different communities One particular concern is the enormous costs involved in conducting genetic research and the fact that the private sector has become heavily

involved the desire to commercialize the results and technology derived from genetic research is considered problematic In September 1998 the Second International Conference on DNA Sampling titled The Commercialization of Genetic Research Ethical Legal and Policy Issues was held of the conference and of this book was to in Edmonton Alberta Canada The goal facilitate an interdisciplinary discussion of the legal ethical and policy implications arising from the commercialization of genetic research We solicited contributions for the book from authors in fields as diverse as ethics law medicine health policy and the social sciences The papers included while based on presentations given at the conference have been substantially expanded and enhanced by the commentary received and discussions held at the conference *The Emergence of Entrepreneurship Policy* David M. Hart, 2003-10-27 This volume seeks to catalyze the emergence of a novel field of policy studies entrepreneurship policy Practical experience and academic research both point to the central role of entrepreneurs in the process of economic growth and to the importance of public policy in creating the conditions under which entrepreneurial companies can flourish The contributors who hail from the disciplines of economics geography history law management and political science seek to crystallize key findings and to stimulate debate about future opportunities for policy makers and researchers in this area The chapters include surveys of the economic social and cultural contexts for US entrepreneurship policy assessments of regional efforts to link knowledge producers to new enterprises explorations of policies that aim to foster entrepreneurship in under represented communities detailed analyses of three key industries biotechnology e commerce and telecommunications and considerations of challenges in policy implementation

Molecular Politics Susan Wright, 1994-10-15 The promise of genetic engineering in the early 1970s to profoundly reshape the living world activated a variety of social interests in its future promotion and control With public safety gene patents and the future of genetic research at stake a wide range of interest groups competed for control over this powerful new technology In this comparative study of the development of regulatory policy for genetic engineering in the United States and the United Kingdom Susan Wright analyzes government responses to the struggles among corporations scientists universities trade unions and public interest groups over regulating this new field Drawing on archival materials government records and interviews with industry executives politicians scientists trade unionists and others on both sides of the Atlantic *Molecular Politics* provides a comprehensive account of a crucial set of policy decisions and explores their implications for the political economy of science By combining methods from political science and the history of science Wright advances a provocative interpretation of the evolution of genetic engineering policy and makes a major contribution to science and public policy studies *Venture Capital and the European Biotechnology Industry* W. Bains, 2008-11-20 This book opens up the world on private equity investment in one of the hottest industries Biotechnology The book describes how Europe has fallen behind the US due to under investment and bad management by the VCs who control the companies Detailed analysis shows why it is in VCs interests to damage the very companies they invest in Subject Guide to Books in Print , 1971
