enhancement on Earth human enhancement in space is considered a serious and necessary option This book aims at scholars in the following fields ethics and philosophy space policy public policy as well as biologists and psychologists **Biomedical Ethics and the Church** Roland Chia,2010 *Developmental Genetics* Billie Wilson,2018-04-14 Developmental Genetics studies how the genes regulate developmental changes in behavior and influence scientific approaches in several fields Genetics is the study of heredity Heredity is a biological process where a parent passes certain genes onto their children or offspring Every child inherits genes from both of their biological parents and these genes in turn express specific traits Some of these traits may be physical for example hair and eye color and skin color etc On the other hand some genes may also carry the risk of certain diseases and disorders that may pass on from parents to their offspring Development is behind what one looks like It is directed by genes the units of heredity which are made up of deoxyribonucleic acid DNA in all animals including man plants microorganisms and most of the viruses except in some viruses where Ribonucleic Acid RNA is the genetic material Developmental Genetics integrates the two disciplines of development and genetics into one Differential gene expression from genetically identical nuclei creates different cell types Differential gene expression can occur at the levels of gene transcription nuclear RNA processing mRNA translation and protein modification Genes are usually repressed Activation of a gene often means inhibiting its repressor This leads to thinking in double and triple negatives Activation is often the inhibition of the inhibitor repression is the inhibition of the inhibitor of the inhibitor Besides useful to the students and teachers of the subject the book will also serve as a reference tool to the researchers in genetics developmental biology regenerative medicine and cell biology **The Cambridge Companion to Christian Ethics** Robin Gill,2012 Twenty essays providing an authoritative introduction to Christian ethics addressing issues such as war social justice ecology sexuality and medicine *African Christian Theology* Samuel Waje Kunhiyop,2023-10-30 God is eternal but the questions we ask about him are always rooted in our own culture Thus our understanding of theology is also rooted in our culture Dr Samuel Kunhiyop is deeply aware of this and so has produced African Christian Theology as a companion book to his African Christian Ethics In this book Dr Kunhiyop addresses many of the same issues mentioned in Western systematic theologies but also addresses issues that are not mentioned in those books including the spirit world ancestors and the power of blessings and curses This book thus constitutes an excellent introduction to systematic theology in relation to the traditional African world view and to the Bible **Disability and the Gospel** Michael S. Beates,2012-07-31 Michael Beates s concern with disability issues began nearly 30 years ago when his eldest child was born with multiple profound disabilities Now as more families like Michael s are affected by a growing number of difficulties ranging from down syndrome to autism to food allergies the need for church programs and personal paradigm shifts is greater than ever Working through key Bible passages on brokenness and disability while answering hard questions Michael offers here helpful principles for believers and their churches He shows us how to embrace our own brokenness and then to embrace those who are more physically

and visibly broken bringing hope and vision to those of us who need it most *Contemporary Catholic Health Care Ethics, Second Edition* David F. Kelly, Gerard Magill, Henk ten Have, 2013-03-28 *Contemporary Catholic Health Care Ethics Second Edition* integrates theology methodology and practical application into a detailed and practical examination of the bioethical issues that confront students scholars and practitioners Noted bioethicists Gerard Magill Henk ten Have and David F Kelly contribute diverse backgrounds and experience that inform the richness of new material covered in this second edition The book is organized into three sections theology basic issues underlying Catholic thought methodology how Catholic theology approaches moral issues including birth control and applications to current issues New chapters discuss controversial end of life issues such as forgoing treatment killing versus allowing patients to die ways to handle decisions for incompetent patients advance directives and physician assisted suicide Unlike anthologies the coherent text offers a consistent method in order to provide students scholars and practitioners with an understanding of ethical dilemmas as well as concrete examples to assist in the difficult decisions they must make on an everyday basis **Nanoethics** Donal P. O'Mathuna, 2010-06-01 Nanotechnology manipulates matter at the atomic level It leads to innovative processes and products that are revolutionizing many areas of modern life Huge amounts of public funds are being invested in the science yet the public has little understanding of the technology or its ethical implications Indeed the ethical social and political dimensions of nanotechnology are only beginning to receive the attention they require outside of science fiction contexts Surveillance devices may become so small that they are practically invisible to the naked eye raising concerns about privacy Nanomedicine may lead to the development of new diagnostic and therapeutic devices yet anxieties have been raised about the impact of nanobots circulating in our bodies Military applications or misuses of nanotechnology raise other concerns This book explores in an accessible and informative way how nanotechnology is likely to impact the lives of ordinary people in the coming years and why ethical reflection on nanotechnology is needed now
