The Routledge Handbook of Discourse Analysis Michael Handford, James Paul Gee, 2013-06-17 Approaches to discourse analysis Register and genre Developments in spoken discourse Educational applications Institutional applications Identity culture and discourse Disciplinarity: Functional Linguistic and Sociological Perspectives Frances Christie, Karl Maton, 2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory

combined in a single section reflecting the hybridism of the majority of the genres under investigation here genres of institutional discourse typically exhibit features akin to advertising not only presenting the institutions in terms of the scope of their activities and services but also serving a clear promotional purpose The studies document how omnipresent varied and plentiful the strategies of intersubjective positioning are and how significant their position in genres and discourses invariably is The social and cultural grounding of genres requires them to be conventional yet it also ensures their flexibility continuous development and change qualities which make genres a permanent challenge and inspiration for research and discussion

Towards Humane Technologies , 2008-01-01 What are the ethical and political implications when the very foundations of life things of awe and spiritual significance are translated into products accessible to few people This book critically analyses this historic recontextualisation Through mediation when meaning moves from one text to another from one discourse to another biotechnology is transformed into analysable data and into public discourses The unique book links biotechnology with media and citizenship As with any commodity biological products have been commodified Because enormous speculative investment rests on this risk will be understated and benefit will be overstated Benefits will be unfairly distributed Already the bioprospecting of Southern megadiverse nations legally sanctioned by U S property rights conventions has led to wealth and health benefits in the North Crucial to this development are biotechnological discourses that shift meanings from a language of life into technocratic discourses infused with neo liberal economic assumptions that promise progress and benefits for all Crucial in this is the mass media s representation of biotechnology for an audience with poor scientific literacy Yet even apparently benign biotechnology spawned by the Human Genome Project such as prenatal screening has eugenic possibilities and genetic codes for illness are eagerly sought by insurance companies seeking to exclude certain people These issues raise important questions about a citizenship that is founded on moral responsibility for the wellbeing of society now and into the future After all biotechnology is very much concerned with the essence of life itself This book provides a space for alternative and dissident voices beyond the hype that surrounds biotechnology
