Geography Resources And Environment:

Geography, Resources, and Environment: Selected writing of Gilbert F. White Robert William Kates, Ian Burton, 1986
Geography, Resources and Environment, Volume 2 Gilbert F. White, 1986 Over the course of half a century Gilbert F White s work has served to shape and in several instances establish many of the fields that have come to be known as the environmental sciences In this collection of original essays a companion volume to White s selected writings volume I leading scholars in areas such as water supply environmental hazards and natural resource management interpret changes in these fields since White s work and assess present and future problems With volume 1 this collection presents a complete and cogent picture of Gilbert White s contribution and the work he inspired **Geography, Resources and Environment, Volume 2** Robert W. Kates, Ian Burton, 1986-04-15 Over the course of half a century Gilbert F White s work has served to shape and in several instances establish many of the fields that have come to be known as the environmental sciences In this collection of original essays a companion volume to White s selected writings volume I leading scholars in areas such as water supply environmental hazards and natural resource management interpret changes in these fields since White s work and assess present and future problems With volume 1 this collection presents a complete and cogent picture of Gilbert White s contribution and the work he inspired *Geography, Resources, and Environment* ,1986 **Geography, Resources and Environment** ,1986 **Geography, Resources, and Environment a Tribute to Gilbert E. White** Antoni Kukliński, 1986 **The American Environment** Lary M. Dilsaver, Craig E. Colten, 1992 In recent decades historical geographers have left study of nature culture interactions to others most notably to environmental historians This collection written specially for this volume reveals a renewed commitment by and a rapidly accelerating research agenda for historical geographers interested in environmental issues Following an introductory literature review each case study explores either the direct unplanned impact of humans on the natural environment or the deliberate management policies designed to shape that impact From their stronghold of applied historical geography the contributors to this volume demonstrate the utility of the historical approach in the study and management of the environment It hopefully signals a renewed interest in the field by workers whose lineage is from the human side of the continuum Stanley W Trimble from the preface **America's Renewable Resources** Kenneth D. Frederick, Roger A. Sedjo, 2013-10-18 By recording one country s experience with its vast natural resource base America s Renewable Resources Historical Trends and Current Challenges will help to inform the management of future demands on the resource base in the U S and throughout the world The contributors focus specifically on renewable resources water forests rangeland cropland and soils and wildlife which possess the capacity to restore themselves after they have be consumed Because this capacity can be destroyed and the time required for restoration can be very long a balance in their use is necessary to sustain continued productivity In arresting fashion the authors trace the history of each resource s use from early colonial times through periods of dramatic sometimes cataclysmic changes in its

utilization by an expanding diversifying society They show how unforeseen consequences have forced social institutions into existence and compelled policy makers especially at the federal level to deal with problems for which they were largely unprepared America's Renewable Resources by examining changes in demand technologies policies and institutions will assist both policy makers and the public at large to look past short term events to the conditions fundamental to maintaining our future economic and environmental wellbeing Originally published in 1991 *The Annotated Guide To Social Science Resources* Pasquale De Marco, 2025-08-09 The social sciences are a vast and ever changing field of study and keeping up with the latest research can be a challenge This book is a comprehensive guide to the social sciences providing a foundation in the major disciplines and introducing students to the latest research and thinking Written by a team of leading scholars the book covers a wide range of topics from the scientific method to the study of culture and society The book is divided into ten chapters each of which focuses on a different social science discipline The chapters are organized around five core themes The Nature of Social Science The Individual and Society The Economy and Politics Culture and Communication Education and the Environment Each chapter is written in a clear and concise style and includes a wealth of examples and case studies to illustrate the key concepts The book also includes a glossary of terms a bibliography and an index This book is an essential resource for students of the social sciences and for anyone who wants to understand the complex world we live in About the Author Pasquale De Marco is a Professor of Sociology at the University of California Berkeley He is the author of numerous books and articles on social inequality social change and the sociology of education If you like this book write a review **The Republic of Adygea Environment** Murat K. Bedanokov, Sergey A. Lebedev, Andrey G. Kostianoy, 2021-05-21 This book outlines the current status of the environment in the Republic of Adygea in Russia The book assesses the environmental conditions ecological state climate and vegetation change anthropogenic loads to soil water and atmosphere as well as highlighting the potential of water resources renewable energy and development of tourism agriculture and industry in this region It also presents the mechanisms of legal ecological and economic regulation and environmental insurance in the Republic of Adygea This book introduces the Republic of Adygea to readers who are not familiar with the Republic and its beautiful landscapes history and people It offers a valuable source of information for a broad readership from students and scientists interested in environmental sciences to policymakers and practitioners working in the fields of environmental policy and management *Resources, Planning and Environmental Management in a Changing Caribbean* David Barker, Duncan F. M. Knowledge, Industry and Environment Richard Le Heron, Roger Hayter, 2018-02-06 This title was first published in 2002 Bringing together a wide range of theoretical and empirical case studies from Canada New Zealand South Korea Turkey China Germany Spain Sweden Poland South Africa Japan The Netherlands and the United Kingdom this book addresses these neglected issues in particular contemplating the vitally important nexus between industry environment and the knowledge economy Throughout the book four key themes and issues are explored institution building strategies agglomeration as territorial context sustainable industrial environmental processes and policy initiatives globalization learning and industrial location dynamics The book concludes with an outline of future research directions within the paradigm Water Resources Policies in South Asia Anjal Prakash, Sreoshi Singh, C. G. Goodrich, S. Janakarajan, 2020-11-29

Falling or stagnant agricultural growth increasing dependence on groundwater climate variability swift industrialization and unplanned and unregulated urbanization in South Asia have spawned a variety of challenges for water resources governance management and use groundwater overdraft insufficient ill managed and poor quality freshwater supply vis vis escalating demand and water pollution Water policies in each of the South Asian countries thus call for a more holistic understanding for the efficient management equitable distribution and sustainable use of this scarce resource Analyzing the economic demographic and ideological context in which water policies are framed and implemented this book argues for an integrated framework in formulating and implementing water policies in South Asia It also highlights some common missing links in the national policies problems of techno centric and blueprint approach to water management growing influence of international donor agencies and inadequate concern for issues such as equity sustainability gender sensitivity accountability regional diversity in property rights regimes and water management practices and regional conflicts over water access The innovative and nuanced knowledge on water resources produced from detailed case studies in India Bangladesh Bhutan Nepal Pakistan and Sri Lanka will be useful for professionals academics policymakers and activists as well as those in development studies environmental studies natural resource management and public administration **The Behavioural Environment** F.W.

Boal, D.N. Livingstone, 2003-09-02 Placing human action and perception at the centre of the subject this book considers the effects of mankind on the environment drawing particularly from William Kirk's work on the behavioural environment model Reviewing Kirk's original model in light of recent ideological debate and extensive new evidence this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man's relationship with the ecological environment The Geographical Sciences During 1986–2015 Shuying Leng, Xizhang Gao, Tao Pei, Guoyou Zhang, Liangfu Chen, Xi Chen, Canfei He, Daming He, Xiaoyan Li, Chunye Lin, Hongyan Liu, Weidong Liu, Yihe Lü, Shilong Piao, Qihong Tang, Fulu Tao, Lide Tian, Xiaohua Tong, Cunde Xiao, Desheng Xue, Linsheng Yang, Linwang Yuan, Yuanming Zheng, Huiyi Zhu, Liping Zhu, 2016-07-28 In four chapters and an introduction this book systematically helps

readers understand the development of the Geographical Sciences both in China and in the world during the past 30 years Through data analysis of methodologies including CiteSpace TDA qualitative analysis questionnaires data mining and mathematical statistics the book explains the evolution of research topics and their driving factors in the Geographical Sciences and its four branches namely Physical Geography Human Geography Geographical Information Science and Environmental Geography It also identifies the role of the Geographical Sciences in the analysis of strategic issues such as global change and terrestrial ecosystems terrestrial water cycle and water resources land change global cryosphere evolution and land surface processes on the Tibetan Plateau economic globalization and local responses regional sustainable development remote sensing modelling and parameter inversion spatial analysis and simulation and tempo spatial processes and modelling of environmental pollutants It then discusses research development and inadequacy of Chinese Geographical Sciences in the above mentioned topics as well as in the fields including Geomorphology and Quaternary environmental change Ecohydrology ecosystem services the urbanization process and mechanism medical and health geography international rivers and transboundary environment and resources detection and attribution of changes in land surface sensitive components and uncertainty of spatial information and spatial analysis It shows that the NSFC has driven the development in all these topics and fields In addition the book summarises trends of the Geographical Sciences in China and the research level in major countries of the world through an overview of geographical education in colleges and universities the analysis of publications citations and author networks of SCI SSCI and CSCD indexed articles and the description of Sino USA Sino UK and Sino German cooperation This book serves as an important reference to anyone interested in geographical sciences and related fields

Mountain Environment A. A. Pirazizy,1993 *The Environment as Hazard* Ian

Burton,1993-04-09 The Environment as Hazard offers an understanding of how people around the world deal with dramatic fluctuations in the local natural systems of air water and terrain Reviewing recent theoretical and methodological changes in the investigation of natural hazards the authors describe how research findings are being incorporated into public policy particularly research on slow cumulative events technological hazards the role played by social systems and the relation of hazards theory to risk analysis Through vivid examples from a broad sample of countries this volume illuminates the range of experiences associated with natural hazards The authors show how modes of coping change with levels of economic development by contrasting hazards in developing countries with those in high income countries comparing the results of hurricanes in Bangladesh and the United States and earthquakes in Nicaragua and California In new introductory and concluding chapters that supplement the original text the authors present new global data sets as well as a trenchant discussion of implications of hazards research for the International Decade for Natural Disaster Reduction and for attempts by the world community to come to grips with the threats of climate change
