**Geological Background to Fossil Man** Walter William Bishop, 1978 Geological Background to Fossil Man Walter Neogene Paleontology of the Manonga Valley, Tanzania Terry Harrison, 2013-11-11 Contributions to this volume detail paleontologic research in Manonga Valley and shed important light on the evolutionary development of eastern Africa Chapters provide novel insights into the taxonomy paleobiology ecology and zoogeographic relationships of African faunas as well as lay the foundation for future geological paleontological and paleoecological studies in this important area The book concludes with a discussion of the importance of investigations on broader geographical sites including the Manonga Valley for human evolution research The text is supported by 143 illustrations The Geology of Early Humans in the Horn of Africa Jay Quade, Jonathan Guy Wynn, 2008 Paleoclimate and Evolution, with Emphasis on Human **Origins** Elisabeth S. Vrba, George H. Denton, Timothy C. Partridge, Lloyd H. Burckle, 1995-01-01 Addressing the relationship between climatic and biotic evolution this work focuses on how climatic change during the last 15 million years especially the last three million has affected human evolution and other evolutionary events Past Climates Leona Marshall Libby, 2014-11-11 Leona Marshall Libby was a pioneer in modern climatic research a field that gained great impetus in the late twentieth century because of the promise it holds for predicting future climatic trends Libby s work led to remarkable new procedures for investigating long term changes in precipitation and temperature and thereby greatly expanding our knowledge of past climates As Professor Rainer Berger writes in his foreword In recent years tree ring based temperature data have been collected which go far beyond the records available to historians These data can be analyzed by Fourier transforms which identify certain periodicities Climatic changes detected by tree rings have been checked against historic records The correspondence is astonishing At present weather forecasting is becoming more accurate for periods on the order of days weeks and months Climatic prognoses have also been attempted for very long times of tens of thousands of years But the intermediate range in the decades and centuries has so far been an enigma It is here where tree ring thermometry plays its trump cards Its potential is enormous in assessing worldwide crop yields water inventory heating requirements stockpiling policies and construction planning as well as political and military prospects Late Cenozoic Environments and Hominid Evolution Peter Andrews, Peter Banham, 1999 Part 3 Quaternary Environments with particular emphases on the English Midlands western Scotland and southern Africa BOOK JACKET Throughout this commemorative volume the determination of editors and authors to place the results of specialist research into their environmental context is perhaps the clearest indication of the visionary influence of Bill Bishop BOOK JACKET
