Osborne White, 1925 **The Practice of British Geology, 1750-1850** Hugh Torrens, 2024-10-28 Geology is the most historical of all sciences Yet its own history remains neglected especially the many aspects of how geology was practised in the past This volume analyses the careers of some important practical figures in English Welsh Scottish and Irish geology between 1750 and 1850 These include people who would have regarded themselves more as mining engineers or coal viewers as they were then called in the vital coal industry or mineral surveyors as today s mineral prospectors were first called from 1808 or even inventors Their expertise in the land which led the industrial revolution took them all over the world Those included here went to Italy and South Peru and North America Virginia and Canada The practice of geology through the search for mines and minerals has been much less attended to by historians than the geology which was undertaken by leisured amateurs even though practical geology was as important in the past as the oil industry is today **Summary of Progress of the Geological Survey of Great Britain and the Museum of Practical Geology** Geological Survey of Great Britain, 1927 *Geology of the British Isles* George Percy Hamnall Boswell, 1918 **Memoirs of the Geological Survey [of] England & Wales** , 1916 **The Yearbook of the Scientific and Learned Societies of Great Britain and Ireland** , 1910 *Official Year-book of the Scientific and Learned Societies of Great Britain and Ireland* , 1910
