Ciencias forenses y servicios periciales: Eliseo Lázaro Ruiz,2024-08-26 En la práctica es posible identificar a las ciencias forenses y a la criminalística moderna con los servicios periciales parte fundamental del sistema penal acusatorio y cuyo correcto funcionamiento requiere de la generación de dictámenes capaces de someterse a verificación comprobación y refutación para analizar su validez, fiabilidad, objetividad y rigurosidad metodológica. Por ello en los últimos años se ha puesto especial énfasis en fortalecer los servicios periciales y la prueba científica por medio de la capacitación y el análisis científico de la práctica forense pericial. El presente libro aborda este objetivo desde un enfoque práctico a través de los trabajos que se han realizado en el Seminario Permanente de Criminalística y Sistema Penal Acusatorio del INACIPE donde han participado peritos, jueces, ministerios públicos e investigadores. Su lectura no solo es importante para la actualización en la materia, sino que forma parte del estado del arte que permite ponderar propuestas innovadoras de acción y curvas de aprendizaje para consolidar la función pericial en el procedimiento penal **Arrojados al Mundo, Arrojados del Mundo**,2012 Arquitectura biodigital Marcelo Fraile,2021-06-17 La rápida e intensiva evolución que han experimentado las tecnologías biológicas y digitales a finales del siglo XX han producido importantes transformaciones en nuestros hábitos cotidianos y laborales. En el campo específico de la arquitectura se iniciaba con esto un universo de nuevos planteos que desafían las concepciones tradicionales del diseño, dando lugar a una arquitectura con una expresión espacial germinal y fluida en continuo proceso de cambio y de transformación hasta su consecución física final. Una arquitectura de modelos digitales producidas a través de una amplia gama de herramientas tecnológicas, modelos paramétricos, algoritmos genéticos, tecnologías CAD/CAM que permiten

ARQUITECTURA RELIGIOSA DEL SIGLO XXI EN ESPAÑA ESTEBAN FERNÁNDEZ-COBIÁN, 2022-09-23. Este libro presenta veinticuatro espacios para el culto realizados en Espa a durante los primeros a os del siglo XXI. Durante las dos ltimas d cadas la arquitectura religiosa contempor nea ha gozado de una particular atenci n en nuestro pa s. El foco se centr principalmente en los a os cincuenta y sesenta del siglo XX cuando las iglesias se situaron por m ritos propios en el primer plano del debate. Sin embargo el periodo que sigui al Concilio Vaticano II (1962-65) todav a no ha sido estudiado en su conjunto. Entre las obras seleccionadas para este volumen se en Uentran veintid s iglesias cat licas una iglesia evanglica y otra levemente interconfesional. Es d f cil saber si estos edificios son realmente significativos de la reciente arquitectura religiosa espa ola en cualquier caso su selecci n responde a una elecci n personal del autor cuyo criterio se ha apoyado exclusivamente en valores arquitect nicos. Y aunque no se hayan incluido mezquitas sinagogas o templos de religiones orientales podemos pensar que este conjunto de iglesias nos dice algo acerca de la situaci n actual de las religiones en Espa a. La arquitectura religiosa permite tomar el pulso de la sociedad en general ya que condensa en s misma una serie de valores que la hacen especialmente sensible para captar las sinergias de cualquier tejido social. Y esto por varios motivos: por su escala singular porque apenas tiene programa y porque para mantenerla a lo largo del tiempo es necesaria la confluencia de muchas voluntades porque trabaja con grandes vac os porque para formalizarla se requieren recursos constructivos no habituales y porque en ella la luz es el tema porque comunica y porque en definitiva aspira a ser sagrada. Ahora bien Cabe hablar de edificios sagrados en la sociedad contempor nea. Qu recursos utilizan los arquitectos para dise arlos? AGi architects, Alejandro Beutell Ch rrez y Cantera, Eduardo Delgado Orusco y Javier Viver Elesio, Gat n, Elisa Valero, Erithacus arquitectos, Gimeno Guitart, 1MB arquitectos, OAB Office of Architecture in Barcelona, Otxotorena arquitectos, Pablo Guill n, Pablo Lpez Aguado, Pablo M Mill n, Rafael Moneo, Rub n, Labiano y Jes s, Bazal Tabuenca y Leache, Vicens Ramos, VZ arquitectos.

Toward a Living Architecture? Christina Cogdell,2019-01-01 A bold and unprecedented look at a cutting edge movement in architecture Toward a Living Architecture is the first book length critique of the emerging field of generative architecture and its nexus with computation biology and complexity Starting from the assertion that we should take generative architects rhetoric of biology and sustainability seriously Christina Cogdell examines their claims from the standpoints of the sciences they draw on complex systems theory evolutionary theory genetics and epigenetics and synthetic biology She reveals significant disconnects while also pointing to approaches and projects with significant potential for further development Arguing that architectural design today often only masquerades as sustainable Cogdell demonstrates how the language of some cutting edge practitioners and educators can mislead students and clients into thinking they are getting something biological when they are not In a narrative that moves from the computational toward the biological and from current practice to visionary futures Cogdell uses life cycle analysis as a baseline for parsing the material energetic and pollution differences between different digital and biological design and construction approaches Contrary to green tech sustainability advocates she questions whether quartzite based silicon technologies and their reliance on rare earth metals as currently designed are sustainable for much longer challenging common projections of a computationally designed and manufactured future Moreover in critiquing contemporary architecture and science from a historical vantage point she reveals the similarities between eugenic design of the 1930s and the aims of some generative architects and engineering synthetic biologists today Each chapter addresses a current architectural school or program while also exploring a distinct aspect of the corresponding scientific language theory or practice No other book critiques generative architecture by evaluating its scientific rhetoric and disjunction from actual scientific theory and practice Based on the author s years of field research in architecture studios and biological labs this rare field building book does no less than definitively unsparingly explain the role
