Geo-engineering for Underground Facilities Gabriel Fernandez, Robert A. Bauer, 1999 GSP 90 contains 95 papers presented at the Third National Conference held at Urbana Champaign Illinois June 13 17 1999 *Geotechnical and Environmental Applications of Karst Geology and Hydrology* B.F. Beck, J.G. Herring, 2001-01-01 This text covers topics such as sinkhole formation and regional studies of sinkholes and karst Issues addressed are taken from the 8th multidisciplinary conference on this subject and chart the characteristics of sinkholes and karst as well as their environmental repercussions

Groundwater Quality and Geochemistry in Arid and Semi-Arid Regions Shakir Ali, Abdelazim Negm, 2024-03-19 This book reviews groundwater quality and its major global contaminants and collects the latest advances in the analysis remediation risk assessment and hydrogeochemistry of groundwater in countries such as Algeria Egypt Ghana Kazakhstan Morocco Saudi Arabia and the USA This book mainly focuses on the major arid and semi arid areas where groundwater is scarce and highly polluted with geogenic and anthropogenic contaminants and the recharge to the groundwater is negligible due to limited rainfall Divided into 2 parts the book starts by covering topics like assessment and protection of groundwater in arid and semi arid regions groundwater pollution and contamination risk assessment Particular attention is given to the application of environmental isotopes in groundwater studies and how anthropogenic activities impact groundwater quality the impact of irrigation reservoirs in groundwater and soil quality and how artificial intelligence is applied to forecast groundwater quality In the second part of this book readers will find more about the major global contaminants of groundwater in arid and semi arid areas including a geochemical analysis of fluoride and nitrate contamination Supported by regional case studies this book appeals to researchers scholars and professionals working in the field of groundwater contamination and remediation and is also an important account for policymakers **Canadian Geotechnical Journal**

, 2011 **American Book Publishing Record**, 2000 Hazardous Waste Management Michael D. LaGrega, Phillip L. Buckingham, Jeffrey C. Evans, 2010-07-30 Hazardous waste management is a complex interdisciplinary field that continues to grow and change as global conditions change Mastering this evolving and multifaceted field of study requires knowledge of the sources and generation of hazardous wastes the scientific and engineering principles necessary to eliminate the threats they pose to people and the environment the laws regulating their disposal and the best or most cost effective methods for dealing with them Written for students with some background in engineering this comprehensive highly acclaimed text does not only provide detailed instructions on how to solve hazardous waste problems but also guides students to think about ways to approach these problems Each richly detailed self contained chapter ends with a set of discussion topics and problems Case studies with equations and design examples are provided throughout the book to give students the chance to evaluate the effectiveness of different treatment and containment technologies **Illinois State Geological Survey** Illinois State Geological Survey, 1999 **Geology--foundation for the New Century** Illinois State Geological Survey, 1999
