Guidebooks Committee,1986 Journey to the Ice Age Peter L. Storck,2011-11-01 At the end of the Ice Age small groups of hunter gatherers crossed from Siberia to Alaska and began the last chapter in the human settlement of the earth Many left little or no trace But one group the Early Paleo Indians exploded onto the archaeological record about 11 500 radiocarbon years ago and expanded rapidly throughout North America sending splinter groups into Central and perhaps South America as well Journey to the Ice Age explores the challenges faced by the Early Paleo Indians of northeastern North America A revealing autobiographical account this is at once a captivating record of Storck s discoveries and an introduction to the practice challenges and spirit of archaeology **Killarney Bay** David S. Brose,Patrick Julig,John M. O'Shea,2021-11-16 The archaeological site at Killarney Bay on the northeast side of Georgian Bay in Ontario Canada has attracted and mystified archaeologists for decades The quantities of copper artifacts exotic cherts and long distance trade goods all highlight the importance of the site during its time of occupation Yet researchers have struggled to date the site or assign it to a particular cultural tradition since the artifacts and mortuary components do not precisely match those of other sites and assemblages in the Upper Great Lakes The history of archaeological investigation at Killarney Bay stretches across parts of three centuries and involves field schools from universities in two countries Laurentian University in Canada and the University of Michigan in the United States This volume pulls together the results from all prior research at the site and represents the first comprehensive report ever published on the excavations and finds at Killarney Bay Heavily illustrated From Meteorite Impact to Constellation City Oiva W. Saarinen,2013-06-15 From Meteorite Impact to Constellation City is a historical geography of the City of Greater Sudbury The story that began billions of years ago encompasses dramatic physical and human events Among them are volcanic eruptions two meteorite impacts the ebb and flow of continental glaciers Aboriginal occupancy exploration and mapping by Europeans exploitation by fur traders and Canadian lumbermen and American entrepreneurs the rise of global mining giants unionism pollution and re greening and the creation of a unique constellation city of 160 000 The title posits the book s two main themes one physical in nature and the other human the great meteorite impact of some 1 85 billion years ago and the development of Sudbury from its inception in 1883 Unlike other large centres in Canada that exhibit a metropolitan form of development with a core and surrounding suburbs Sudbury developed in a pattern resembling a cluster of stars of differing sizes Many of Sudbury s most characteristic attributes are undergoing transformation Its rocky terrain and the negative impact from mining companies are giving way to attractive

neighbourhoods and the planting of millions of trees Greater Sudbury's blue collar image as a union powerhouse in a one industry town is also changing recent advances in the fields of health education retailing and the local and international mining supply and services sector have greatly diversified its employment base This book shows how Sudbury evolved from a village to become the regional centre for northeastern Ontario and a global model for economic diversification and environmental rehabilitation      *Union List of Geologic Field Trip Guidebooks of North America* Richard A.
