Econometrics Econometric Modeling Of Producer Behavior Vol 1:

Econometrics: Econometric modeling of producer behavior Dale Weldeau Jorgenson, 2000 This volume summarizes the economic theory the econometric methodology and the empirical findings resulting from the new approach to econometric modelling of producer behaviour *Growth, Volume 1* Dale W. Jorgenson, 1998-12-07 Volume 1 Econometric General Equilibrium Modeling presents an econometric approach to general equilibrium modeling of the impact of economic policies Earlier approaches were based on the calibration of general equilibrium models to a single data point The obvious disadvantage of calibration is that it requires highly restrictive assumptions about technology and preferences such as fixed input output coefficients These assumptions are contradicted by the massive evidence of energy conservation in response to higher world energy prices beginning in 1973 The econometric approach to general equilibrium modeling successfully freed economic policy analysis from the straitjacket imposed by calibration As a consequence of changes in energy prices and new environmental policies a wealth of historical experience has accumulated over the past two decades Interpreted within the framework of the neoclassical theory of economic growth this experience provides essential guidelines for future policy formation Volume 2 Energy the Environment and Economic Growth presents a new econometric general equilibrium model of the United States that captures the dynamic mechanisms underlying growth trends and responses to energy and environmental policies Jorgenson uses the model to analyze the impacts of environmental regulations on US economic growth and tax policies for controlling U S emissions of carbon dioxide **Econometrics: Economic growth in the information age** Dale Weldeau Jorgenson, 2000 Volumes 1 and 3 contain papers written or co written by Jorgenson Volume 2 is a collection of 13 revised and updated papers presented at a conference held on May 7 8 1993 at the John F Kennedy School of Government Harvard University to honor Jorgenson on the occasion of his 60th birthday **Econometrics: Econometrics and the cost of capital : essays in honor of Dale W. Jorgenson** Dale Weldeau Jorgenson, 2000 This volume summarizes the economic theory the econometric methodology and the empirical findings resulting from the new approach to econometric modelling of producer behaviour **Isoquantal Capital Modulation** William Mckibbin, 2005 The purpose of business is to employ capital factors in such a manner as to generate value for its customers and profits for its owners To achieve these ends management must make at least three distinct decisions the operating investment and financing decisions The purpose of this study is to formulate a modeling methodology that harmonically analyzes and explains how the investment decision and capital elasticity influence competitive advantage The research explores the descriptive literature for the current states of computational modeling accounting theory and practice managerial finance macroeconomics capital theory and harmonic analysis in order to provide evidence supporting the content validity of a proposed modeling framework which encodes modulates and transforms raw financial data into waveforms suitable for harmonic analysis The framework is operationalized algebraically translated into a high level computational language and

subsequently tested using simulation methods in order to analyze the computational robustness of the implementation Finally empirical testing shows a significant correlation exists between the model s reported results and the profitability of sole proprietorships in the U S providing initial evidence of the framework s construct validity Additional empirical testing shows that the relationship between the model s reported results and net profitability is stronger than results returned from the use of raw capital magnitudes providing evidence of the model s positive capacity for recommending decisions The study uses extant financial data obtained from the Internal Revenue Service IRS which maintains and releases Federal tax information extracted from its archives into the public domain through its Statistics of Income SOI programs Econometrics:

Econometric modeling of producer behavior Dale Weldeau Jorgenson, 2000 **Production Structure and Productivity of Japanese Agriculture** Y. Kuroda, 2013-06-20 Analyses quantitatively in a comprehensive consistent and integrated manner the production structure and productivity of post war Japanese agriculture for the latter half of the twentieth century more specifically 1957-97

The Palgrave Companion to Harvard Economics Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two volumes show how economics became established at the University how it produced some of the world s best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics Output,

Employment and Financial Sanctions in South Africa Mr. Tamim Bayoumi, 1990-12-01 The effects of the marked slowdown in the growth of the capital stock in South Africa since 1985 associated with political uncertainty and financial sanctions and future growth prospects are quantified using a modified version of the Lewis development model This is done by estimating production functions for the nonprimary and mining sectors of the South African economy involving skilled white labor unskilled nonwhite labor and capital It is concluded that each 1 percent change in the growth rate of the capital stock leads to at 0.8 percent change in output growth and hence the fall in investment since 1985 has led to significant falls in growth employment and real wages Agricultural Productivity Susan M. Capalbo, John M. Antle, 2015-08-11 This book first published in 1988 provides a comprehensive integrated body of knowledge concerning agricultural productivity research highlighting both its strengths and limitations This book will be of value to scholars and research leaders for the knowledge it conveys of future productivity research and will also be of interest to students of environmental studies

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1,200 entries in A-Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law

psychology organizational behavior and the history and development of the social sciences in a broader sense **Choice**,2000 **Growth: Econometric general equilibrium modeling** Dale Weldeau Jorgenson,1998 As a consequence of changes in energy prices and new environmental policies a historical experience has accumulated over the past two decades Interpreted within the framework of the neoclassical theory of economic growth this experience provides essential guidelines for future policy formation *The Journal of Agricultural Economics Research* ,1988 **Econometrics and the Philosophy of Economics** Bernt P. Stigum,2015-12-29 As most econometricians will readily agree the data used in applied econometrics seldom provide accurate measurements for the pertinent theory s variables Here Bernt Stigum offers the first systematic and theoretically sound way of accounting for such inaccuracies He and a distinguished group of contributors bridge econometrics and the philosophy of economics two topics that seem worlds apart They ask How is a science of economics possible The answer is elusive Economic theory seems to be about abstract ideas or it might be said about toys in a toy community How can a researcher with such tools learn anything about the social reality in which he or she lives This book shows that an econometrician with the proper understanding of economic theory and the right kind of questions can gain knowledge about characteristic features of the social world It addresses varied topics in both classical and Bayesian econometrics offering ample evidence that its answer to the fundamental question is sound The first book to comprehensively explore economic theory and econometrics simultaneously Econometrics and the Philosophy of Economics represents an authoritative account of contemporary economic methodology About a third of the chapters are authored or coauthored by Heather Anderson Erik Bi rn Christophe Bontemps Jeffrey A Dubin Harald E Goldstein Clive W J Granger David F Hendry Herman Ruge Jervell Dale W Jorgenson Hans Martin Krolzig Nils Lid Hjort Daniel L McFadden Grayham E Mizon Tore Schweder Geir Storvik and Herman K van Dijk *Growth: Energy, the environment, and economic growth* Dale Weldeau Jorgenson,1998 *Energy Abstracts for Policy Analysis* ,1985-07 **New Developments in Productivity Analysis** Charles R. Hulten,Edwin R. Dean,Michael Harper,2007-11-01 The productivity slowdown of the 1970s and 1980s and the resumption of productivity growth in the 1990s have provoked controversy among policymakers and researchers Economists have been forced to reexamine fundamental questions of measurement technique Some researchers argue that econometric approaches to productivity measurement usefully address shortcomings of the dominant index number techniques while others maintain that current productivity statistics underreport damage to the environment In this book the contributors propose innovative approaches to these issues The result is a state of the art exposition of contemporary productivity analysis Charles R Hulten is professor of economics at the University of Maryland He has been a senior research associate at the Urban Institute and is chair of the Conference on Research in Income and Wealth of the National Bureau of Economic Research Michael Harper is chief of the Division of Productivity Research at the Bureau of Labor Statistics Edwin R Dean formerly associate commissioner for Productivity and Technology at the Bureau of Labor Statistics is adjunct professor of

economics at The George Washington University Statistical Multiple Integration Nancy Flournoy, Robert K. Tsutakawa, American Mathematical Society, Institute of Mathematical Statistics, Society for Industrial and Applied Mathematics, 1991 High dimensional integration arises naturally in two major sub fields of statistics multivariate and Bayesian statistics Indeed the most common measures of central tendency variation and loss are defined by integrals over the sample space the parameter space or both Recent advances in computational power have stimulated significant new advances in both Bayesian and classical multivariate statistics In many statistical problems however multiple integration can be the major obstacle to solutions This volume contains the proceedings of an AMS IMS SIAM Joint Summer Research Conference on Statistical Multiple Integration held in June 1989 at Humboldt State University in Arcata California The conference represents an attempt to bring together mathematicians statisticians and computational scientists to focus on the many important problems in statistical multiple integration The papers document the state of the art in this area with respect to problems in statistics potential advances blocked by problems with multiple integration and current work directed at expanding the capability to integrate over high dimensional surfaces Finance, Research, Education and Growth L. Paganetto, E. Phelps, 2003-01-31 A crucial issue in the era of globalisation and internationalization is whether the relationship between investment and finance is beneficial to growth and development Received wisdom is that Research and Development is essential not only for maintaining productivity but also for competing in the marketplace Similar questions have been raised about education and its rate of social return is education necessary for improving the skill of the workforce or does it serve primarily to facilitate the adoption of these new technologies This book brings together a case of leading international scholars to analyze the importance of education research and human capital and the impact of financial systems on growth and development
