The Effect of Employer Sanctions on the Flow of Undocumented Immigrants to the United States Keith Crane, 1990 Assesses effects of the 1986 Immigration Reform and Control Act IRCA designed to reduce the flow of undocumented immigrants to the United States Applies a mathematical model to data collecting based on wage rates Migration to the United States Frank D. Bean, Barry Edmonston, Jeffrey S. Passel, 1990 Contains a collection of essays Assesses the impact of the Immigration Reform and Control Act IRCA of 1986 on illegal immigration with emphasis on undocumented migration from Mexico Migration Policies in Europe and the United States Giacomo Luciani, 2012-12-06 The themes of migration and economic development are traditionally related The debate over these issues has recently gained great relevance particularly in Europe as the phenomenon of migration tends to be seen as a possible conse quence and cause of political and environmental unrest In this case the im pacts of migration have not only to do with development but also with welfare social norms and political stability In recent months the issues of xenophobia of openness to refugees of a rea sonable attitude towards international migration have come to the fore as a key to the future shape of Europe The discussion is unfortunately couched in ex treme and irrational terms social scientists may bear part of the responsibility for this because for a very long time they devoted only minimal attention to the phenomenon of international migration and we are still lacking a coherent view which will integrate international development with the freedom of movement of capital and labour and the preservation of the environment Given the growing attention on the issue the Conference organised by Fondazione Eni Enrico Mattei on 3 4 June 1991 at the Centro Studi Americani in Roma was extremely timely In the light of new migration phenomena such as the migration wave into Germany from the East or into Italy from Albania the Conference represented a unique opportunity to think of new policy measures to tackle migration Theoretical Perspectives Marcelo M. Suárez-Orozco, Carola Suárez-Orozco, Desirée Qin-Hilliard, 2014-06-03 This six volume set focuses on Latin American Caribbean and Asian immigration which accounts for nearly 80 percent of all new immigration to the United States The volumes contain the essential scholarship of the last decade and present key contributions reflecting the major theoretical empirical and policy debates about the new immigration The material addresses vital issues of race gender and socioeconomic status as they intersect with the contemporary immigration experience Organized by theme each volume stands as an independent contribution to immigration studies with seminal journal articles and book chapters from hard to find sources comprising the most important literature on the subject The individual volumes include a brief preface presenting the major themes that emerge in the materials and a bibliography of further recommended readings In its coverage of the most influential scholarship on the social economic educational and civil rights issues revolving around new immigration this collection provides an invaluable resource for students and researchers in a wide range of fields including contemporary American history public policy education sociology political science demographics immigration law ESL
