*Food Fight* Stuart Gillespie, 2025-09-02 Scholarly literate and deeply moving this isn't just a good read it's an essential reference for anyone hoping to understand the food system why it's broken and how we might imagine fixing it Chris Van Tulleken author of *Ultra Processed* People Food is life but our food system is killing us Designed in a different century for a different purpose to mass produce cheap calories to prevent famine it's now generating obesity ill health and premature death We need to transform it into one that is capable of nourishing all eight billion of us and the planet we live on In *Food Fight* Stuart Gillespie reveals how the food system we once relied upon for global nutrition has warped into the very thing making us sick From its origins in colonial plunder through the last few decades of neoliberalism the system now lies in the tight grip of a handful of powerful transnationals whose playbook is geared to profit at any cost Both unflinching expos and revolutionary call to arms *Food Fight* shines a light inside the black box of politics and power and crucially maps a way towards a new system that gives us hope for a future of global health and justice

**Food Fight** McKay Jenkins, 2018-02-13 Are GMOs really that bad A prominent environmental journalist takes a fresh look at what they actually mean for our food system and for us In the past two decades GMOs have come to dominate the American diet Advocates hail them as the future of food an enhanced method of crop breeding that can help feed an ever increasing global population and adapt to a rapidly changing environment Critics meanwhile call for their banishment insisting GMOs were designed by overeager scientists and greedy corporations to bolster an industrial food system that forces us to rely on cheap unhealthy processed food so they can turn an easy profit In response health conscious brands such as Trader Joe's and Whole Foods have started boasting that they are GMO free and companies like Monsanto have become villains in the eyes of average consumers Where can we turn for the truth Are GMOs an astounding scientific breakthrough destined to end world hunger Or are they simply a way for giant companies to control a problematic food system Environmental writer McKay Jenkins traveled across the country to answer these questions and discovered that the GMO controversy is more complicated than meets the eye He interviewed dozens of people on all sides of the debate scientists hoping to engineer new crops that could provide nutrients to people in the developing world Hawaiian papaya farmers who credit GMOs with saving their livelihoods and local farmers in Maryland who are redefining what it means to be sustainable The result is a comprehensive nuanced examination of the state of our food system and a much needed guide for consumers to help them make more informed choices about what to eat for their next meal

storied career Each volume collects previously published work on a biblical theme that has deeply informed Brueggemann's scholarship in an accessible digest for readers who want to freshly engage his prophetically minded but approachable writing on the topic The Bible often associates God's grace with abundance While it is sometimes equated with forgiveness more often grace is described much more broadly in the texts of ancient Israel as the divine self-giving that stands against various forms of scarcity We are bombarded daily with the idea that there is not enough of anything housing jobs resources By contrast the Bible shows again and again how God meets our needs abundantly but in such a way that unveils our profound ongoing need for God and for one another The first part of *Grace Abounds* lays out fundamentals of biblical grace by focusing on some of our most basic needs to eat to use land to find shelter and four different types of responses from people in Scripture struggling to survive experiences of exile and forced migration In the second part of the book Brueggemann advocates for specific biblical practices that are appropriate to the reality and experience of God's grace and grace-full relationships with fellow creatures keeping Sabbath making doxology bestowing blessing offering forgiveness and realizing reconciliation Questions for reflection are included at the end of each chapter making this book ideal for individual or group study
