 last years as a result of the dramatic changes caused by a more and more industrialised life style The consumer is drawn to  
 interesting healthy pleasurable exciting or completely new taste experiences This book draws on the expert knowledge of  
 nearly 40 contributors with backgrounds in both industry and academia and provides a comprehensive insight into the  
 production processing and application of various food flavourings Methods of quality control and quality management are  
 discussed in detail The authors also focus on conventional and innovative analytical methods employed in this field and last  
 but not least on toxicological legal and ethical aspects Up to date references to pertinent literature and an in depth subject  
 index complete the book      **Modified Atmosphere Packaging of Food** Ooraikul,2013-03-11 At the 50th Anniversary  
 Meeting of the Institute of Food Technologists the ten most significant innovations in food science developed during the past  
 50 years were named Food Technology September 1989 Among the Top 10 innovations controlled atmosphere packaging  
 CAP for fruits and vegetables was listed 5th in order of importance Of course CAP is a forerunner of MAP modified  
 atmosphere packaging in which a variety of food products are packaged under selective mixtures of atmospheric gases but  
 without the on going maintenance control of the gas mixture Development of packaging systems and films that are selectively  
 permeable to specific gases has been the key element in the commercialization of controlled and modified atmosphere  
 packaging of foods It may not be far from the truth to say that since then there has been an explosion of activities around  
 MAP CAP especially in research and development into various aspects of this technology The application of MAP to some  
 bakery products fresh fruits and salads and fresh meats and meat products has reached a significant level both in Europe and  
 North America The increasing consumer demand for fresh or near fresh products and convenient microwavable foods has  
 added impetus to the growth of MAP CAP technology It is therefore timely that a comprehensive book that provides scientific  
 background and practical applications of the technology should be written      **Elementary Food Science** Richard
