non communicable diseases NCDs is increasingly engaging international organisations and national and sub national governments In this book experts from a range of backgrounds provide insights into the legal implications of regulating tobacco alcohol and unhealthy foods all of which are risk factors for NCDs As individual countries and the international community move to increase targeting of these risk factors affected industries are turning to national and international law to challenge the resulting regulations This book explores how the effective regulation of tobacco alcohol and unhealthy foods can be achieved within the context of international health law international trade and investment law international human rights law international intellectual property law and domestic laws on constitutional and other matters Its contributors consider the various tensions that arise in regulating NCD risk factors as well as offering an original analysis of the relationship between evidence and health regulation Covering a range of geographical areas including the Americas the European Union Africa and Oceania the book offers lessons for health and policy practitioners and scholars in navigating the complex legal fields in which the regulation of tobacco alcohol and unhealthy foods takes place

Ensuring Global Food Safety Christine Boisrobert,Sangsuk Oh,Aleksandra Stjepanovic,Huub Lelieveld,2009-11-11 Taking into account toxicity levels at normal consumption levels intake per kg bodyweight and other acknowledged considerations each chapter in this book will be based on one or more proven examples It is intended to provide specific examples and potential improvements to the safety of the world s food supply while also increasing the amount of food available to those in undernourished countries This book is designed to to provide science based tools for improving legislation and regulation Reduce amount of food destroyed due to difference in regulations between nations Positively impact the time to market of new food products by recognizing benefit of one rule that applies to all Use the comparison of regulations and resulting consequences to make appropriate fully informed decisions Employ proven science to obtain global consensus for regulations Understand how to harmonize test protocols and analytical methods for accurate measurement and evaluation Take advantage of using a risk benefit based approach rather than risk avoidance to maximize regulatory decisions

Regulation of Genome Editing in Plant Biotechnology Hans-Georg Dederer,David Hamburger,2019-08-16 This book provides in depth insights into the regulatory frameworks of five countries and the EU concerning the regulation of genome edited plants The country reports form the basis for a comparative analysis of the various national regulations governing genetically modified organisms GMOs in general and genome edited plants in particular as well as the underlying regulatory approaches The reports which focus on the regulatory status quo of genome edited plants in Argentina Australia Canada the EU Japan and the USA were written by distinguished experts following a uniform structure On this basis the legal frameworks are compared in order to foster a rational assessment of which approaches could be drawn upon to adjust or to completely realign the current EU regime for GMOs In addition a separate chapter identifies potential best practices for the regulation of plants derived from genome editing

Global Business Regulation John Braithwaite,Peter Drahos,2000-02-13 Across an amazing sweep of the critical

areas of business regulation from contract intellectual property and corporations law to trade telecommunications labour standards drugs food transport and environment this book confronts the question of how the regulation of business has shifted from national to global institutions Based on interviews with 500 international leaders in business and government this book examines the role played by global institutions such as the WTO the OECD IMF Moody s and the World Bank as well as various NGOs and significant individuals The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision making bodies that would otherwise be dominated by concentrated economic interests This book will become a standard reference for readers in business law politics and international relations

Food Law Handbook Harold Schultz,2012-12-06 Of all industries in the United States the food industry must in fact be the most regulated by law If it is not its competition for this distinction goes unnoticed All phases of the food industry are subjected to some control by law beginning with the land food is grown on and the oceans from which it is harvested Seed and plant stock are sometimes subjected to control such as to the nutritional value of the foods they produce Acreages of agricultural crops the quantities of foods to be produced are regulated As foods are produced whether from plants or animals the substances applied to increase yields or provide protection from pests are controlled to insure safe use As foods enter and pass through the huge marketing system they are scrutinized from beginning to end by regulatory agents operating under authority of food laws Those foods which are transformed through various technologies into today s thousands of consumer products are watched carefully to insure the appropriateness and safety of added ingredients not all of which are natural and the adequacy of processing packaging and storage Finally the representation of foods to consumers through labeling and advertising is controlled to make sure it is accurate and sufficiently informative

European Food Regulation after Enlargement Karolina Źurek,2011-11-11 This book presents a critical legal perspective on the current direction of EU food regulation Analysing three regulatory mechanisms mutual recognition scientific risk regulation and standardisation in the evolution of food legislation in the EU the book shows the inadequacy of the current framework in facing the challenges of enlargement Using the particular experience of a new member state Poland the book argues that an enlarged Europe must not disregard diverse socio economic implications of market regulation Due to historical legacies and a bias in favour of homogeneity the EU food regulatory regime has generated a one dimensional crisis oriented approach As a result it tends to overlook other legitimate concerns such as quality diversity and local traditions This book argues that this need not be so
