For Future Generations:

Institutions For Future Generations Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice It should also press us to provide institutional design proposals to change the decision making world that surrounds us This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences It provides citizens activists firms charities public authorities policy analysts students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today's excessive short termism *Citizen Science for Future Generations* Reuven Yosef, Piotr Tryjanowski, 2022-03-02 *Giving Future Generations a Voice* Linehan, Jan, Lawrence, Peter, 2021-08-27 This important book focuses on how newly emerging institutions for future generations can contribute to tackling large scale global environmental problems such as threats to biodiversity and climate change It is especially timely given the new global impetus for decarbonisation as well as the huge growth of climate litigation and climate protest movements often led by young people *For India's Future Generations* Prahalad Rao, 2024-12-28 Graduated in Commerce 1961 with certifications in Vigilance Institute of Secretariat Training Management and Parliamentary Procedures Bureau of Parliamentary Studies Training Completed a ten day training at the World Bank Washington in 1990 Served as a Team Member for World Bank and ADB project appraisals and loan negotiations for power projects in India Worked 30 years with REC 18 years and PFC 12 years Post retirement joined a UK based multinational consultancy for seven years In 2006 engaged by PFC as a consultant to advise on SPV policies under the Ultra Mega Power Projects initiative GOI MOP Joined a German consultancy in 2008 as Senior Advisor for Finance Commercial and Regulatory Affairs earning awards for Best Professional Employee and Special Contributions *Creating a New History for Future Generations* James Allen Dator, Tae-Chang Kim, 1994 *125 Years for the Next Generation*, 2016 **Business, Government and Sustainable Development** Gerard Keijzers, 2004-08-19 The range of sustainability objectives has now developed from relatively simple issues of environmental protection to a full array of interwoven social economic and ecological issues nationally and internationally The involved process of sustainable development has now become a permanent and increasingly complex process In this insightful book **Thinking Through the Environment** Mark J. Smith, 2005-09-30 This broad ranging and thought provoking set of readings stresses the diversity of responses in the way the natural environment has been understood and questioned in the modern world **Standard-setting in UNESCO.** Abdulqawi A. Yusuf, 2007 Standard setting represents one of the main constitutional functions of UNESCO and an important

tool for realizing the goals for which the organization was created In addition to conventions and recommendations the declarations adopted by the General Conference promulgate principles and norms intended to inspire the action of member states in specific fields of activity Topics addressed in the first volume include methods of elaboration and implementation constitutional objectives and legal commitments international collaboration and impact Volume 2 contains conventions and agreements adopted by the General Conference and by intergovernmental conferences convened by UNESO itself or jointly by UNESCO and other international organizations as well as the recommendations issued by the General Conference and UNESCO declarations Together these two volumes compose an invaluable commentary and reference work that should be of interest to scholars practitioners diplomats policy makers and students of international organizations Publisher s description

Coming Back to Life Joanna Macy,Molly Young Brown,2014-11-01 Coming Back to Life has helped people transform denial despair and grief in the face of the social and ecological challenges of our time This new completely updated edition repositions the classic work within the context of deepening global crises and the cognitive spiritual and perceptual revolutions occurring all around us Ecology and Society Luke Martell,2013-04-23 This book introduces green ideas to

students of the social sciences showing how society affects and is affected by nature and assessing the future of the green movement Intergenerational Equity ,2019-03-19 In Intergenerational Equity Environmental and Cultural Concerns the editors have produced an important broad based volume on intergenerational equity The authors explore the principle of intergenerational equity in many dimensions from the theoretical to the practical While the primary focus is on intergenerational equity in the context of environmental resources and cultural heritage the principle is also addressed in a broad array of other contexts The final section of the volume considers intergenerational justice as it applies to indigenous peoples genocide migration sovereign wealth funds and foreign investment The chapters also provide a critical analysis of the issues and a consideration of the difficulties in implementing intergenerational equity **A Companion to Applied**

Ethics R. G. Frey,Christopher Heath Wellman,2008-04-15 Applied or practical ethics is perhaps the largest growth area in philosophy today and many issues in moral social and political life have come under philosophical scrutiny in recent years Taken together the essays in this volume including two overview essays on theories of ethics and the nature of applied ethics provide a state of the art account of the most pressing moral questions facing us today Provides a comprehensive guide to many of the most significant problems of practical ethics Offers state of the art accounts of issues in medical environmental legal social and business ethics Written by major philosophers presently engaged with these complex and profound ethical issues *International Sustainable Development Law - Volume I* A. F. Munir Maniruzzaman,Aaron Schwabach, Arthur John Cockfield, A. Dan Tarlock, John C. Dernbach and Gabriela Maria Kutting,2010-10-30 International Sustainable Development Law is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on International Sustainable

Development Law reflects on the rights and duties of states and other actors in the development process. The chapters range from International Development Law standard applications of economic theory to more radical approaches. These three volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers and Decision Makers, NGOs and GOs. **SOCIAL AND ECONOMIC DEVELOPMENT - Volume VIII** Salustiano del Campo, Tomoko Hamada, Giancarlo Barbiroli, Saskia Sassen, Eleonora Barbieri-Masini, Paul Nchoji Nkwi, Owen Sichone, Abubakar Momoh, 2010-11-15. Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. The Theme on Social and Economic Development provides the essential aspects and a myriad of issues of great relevance to our world, such as Socioeconomic Development, Social Work, Perspectives on Contemporary Socioeconomic Development, Sustainable Development of Natural Resource Capital, Sustainable Development of Human Resource Capital, Intellectual and Knowledge Capital for Sustainable Development at Local, National, Regional, and Global Levels, Economic and Financial System Development, Information and Knowledge, Institutional and Infrastructure System Development, Information and Knowledge, Basic Principles of Sustainable Development, Environmental Economics and Sustainable Development, Implementing Sustainable Development in a Changing World, Economic Sociology, Its History and Development, The Socioeconomics of Agriculture, Agricultural and Rural Geography, Impact of Global Change on Agriculture, Human Nutrition, An Overview, The Role of Inter- and Nongovernmental Organizations, Nongovernmental Organizations, Social and Cultural Development of Human Resources. This 8-volume set contains several chapters, each of size 5000-30000 words, with perspectives, issues on social and Economic Development. These volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel and Policy analysts, managers and decision makers, and NGOs. **Contemporary Issues in International Environmental Law** M. Fitzmaurice, 2009-01-01. Highly recommended as a key contribution to the literature. It fulfils its title in being contemporaneous but more than that it also provides a subtle critique of how many international environmental lawyers have approached their subject; this book will be an essential read for anyone interested in the subject. *British Yearbook of International Law*. This book presents an interesting scholarly read, an invaluable reference asset to law students, researchers, policy makers, and non-state actors with interest in environmental regulation and governance. *Priscilla Schwartz Journal of Environmental Law*. This is a thoughtful and well-researched study of current issues in international environmental law. Malgosia Fitzmaurice's collection of essays is a welcome addition to the literature in this rapidly developing area of the law; it provides perspective on the environmental law issues discussed but always against the background of the broader concepts and principles of general international law. James Crawford, University of Cambridge, UK. The central aim of this insightful book is to illuminate how many concepts in international environmental law, such as the

precautionary principle and sustainable development are taken for granted These problematic issues are very much still evolving and subject to heated debate between scholars as well as between states The author explores these controversies viewing them as a positive development within a field that is in a constant state of flux Areas discussed include the convergence of human rights with environmental issues and the quest for the human right to a clean environment The book also clearly demonstrates that international environmental law cannot be analysed in isolation since it greatly influences the development of general international law Taking full account of the most recent decisions of international courts and tribunals as well as the most up to date scholarly analysis *Contemporary Issues in International Environmental Law* is a timely and important resource for legal scholars under and post graduates and practitioners alike

Justice, Posterity, and the Environment Wilfred Beckerman, Joanna Pasek, 2001-05-03 In rich countries environmental problems are seen as problems of prosperity In poor countries they are seen as problems of poverty This is because the environmental problems in poor countries such as lack of clean drinking water are problems that affect them here and now whereas in rich countries the environmental problems that people worry about most are those that largely as a result of current prosperity and economic growth seem likely to harm mainly future generations But what exactly are our obligations to future generations Are these determined by their rights or intergenerational justice or equity or sustainable development The first part of the book argues that none of these concepts provides any guidance but that we still have a moral obligation to take account of the interests that future generations will have And an appraisal of probable developments suggests that while environmental problems have to be taken seriously our main obligation to future generations is to bequeath to them a society in which there is greater respect for basic human rights than is the case today Furthermore generations are not homogeneous entities Resources devoted to environmental protection cannot be used for say health care or education or housing not to mention the urgent claims in poor countries for better food sanitation drinking water shelter and basic infrastructures to prevent or cure widespread disease It cannot serve the interests of justice if the burden of protecting the environment for the benefit of posterity is born mainly by poorer people today

Radioactive Waste Engineering and Management Shinya Nagasaki, Shinichi Nakayama, 2015-04-07 This book describes essential and effective management for reliably ensuring public safety from radioactive wastes in Japan This is the first book to cover many aspects of wastes from the nuclear fuel cycle to research and medical use allowing readers to understand the characterization treatment and final disposal of generated wastes performance assessment institutional systems and social issues such as intergenerational ethics Exercises at the end of each chapter help to understand radioactive waste management in context

Genetic Turning Points James C. Peterson, 2001 *Genetic Turning Points* is an outstanding study of the problem of genetic engineering and related ethical issues It addresses difficult and sometimes technical matters in a style that is both clear and scholarly and it provides valuable insights into issues that are being thrust to the fore by scientific progress Genes store the directions for all life on

earth If you want to know where we might be going read this book It is a road map that can save you from many ill fated journeys William R Shea Global Bioethics Henk ten Have, 2016-02-10 The panorama of bioethical problems is different today Patients travel to Thailand for fast surgery commercial surrogate mothers in India deliver babies to parents in rich countries organs body parts and tissues are trafficked from East to Western Europe physicians and nurses migrating from Africa to the U S thousands of children or patients with malaria tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems This book provides an introduction into the new field of global bioethics Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy but that criticizes the social economic and political context that is producing the problems at global level This book argues that global bioethics is a necessity because the social economic and environmental effects of globalization require critical responses Global bioethics is not a finished product that can simply be applied to solve global problems but it is the ongoing result of interaction and exchange between local practices and global discourse It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values The book examines the nature of global problems as well as the type of responses that are needed in order to exemplify the substance of global bioethics It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices
