The Minds of Marginalized Black Men Alford A. Young Jr., 2011-10-30 While we hear much about the culture of poverty that keeps poor black men poor we know little about how such men understand their social position and relationship to the American dream Moving beyond stereotypes this book examines how twenty six poverty stricken African American men from Chicago view their prospects for getting ahead It documents their definitions of good jobs and the good life and their beliefs about whether and how these can be attained In its pages we meet men who think seriously about work family and community and whose differing experiences shape their views of their social world Based on intensive interviews the book reveals how these men have experienced varying degrees of exposure to more privileged Americans differences that ground their understandings of how racism and socioeconomic inequality determine their life chances The poorest and most socially isolated are perhaps surprisingly most likely to believe that individuals can improve their own lot By contrast men who regularly leave their neighborhood tend to have a wider range of opportunities but also have met with more racism hostility and institutional obstacles making them less likely to believe in the American Dream Demonstrating how these men interpret their social world this book seeks to de pathologize them without ignoring their experiences with chronic unemployment prison and substance abuse It shows how the men draw upon such experiences as they make meaning of the complex circumstances in which they strive to succeed

and popular culture contributors also examine the impact of race class sexual orientation and age

Contemporary Black Men's Fiction and Drama Keith Clark, 2001 Demonstrating the extraordinary versatility of African American men's writing since the 1970s this forceful collection illustrates how African American male novelists and playwrights have absorbed challenged and expanded the conventions of black American writing and with it black male identity From the John Henry Syndrome a definition of black masculinity based on brute strength or violence to the submersion of black gay identity under equations of gay with white and black with straight the African American male in literature and drama has traditionally been characterized in ways that confine and silence him Contemporary Black Men's Fiction and Drama identifies the forces that limit black male discourse including traditions established by iconic African American male authors such as James Baldwin Richard Wright and Ralph Ellison This thoughtful volume also shows how contemporary black male authors use their narratives to put forward new ways of being and knowing that foster a more complete sense of self and more humane and open ways of communicating with and relating to others In the work of Charles Johnson Ernest Gaines and August Wilson contributors find paths toward broader less rigid ideas of what black literature can be what the connections among individual and communal resistance can be and how black men can transcend the imprisoning models of hyper masculinity promoted by American culture Seeking greater spiritual connection with the past John Edgar Wideman returns to the folk rituals of his family while Melvin Dixon and Brent Wade reclaim African roots and traditions Ishmael Reed struggles with a contemporary cultural oppression that he sees as an insidious echo of slavery while Clarence Major's experimental writing suggests how black men might reclaim their own voices in a culture that silences them Taking in a wide range of critical theoretical cultural gender and sexual concerns Contemporary Black Men's Fiction and Drama provides provocative new readings of a broad range of contemporary writers
