experiences of two major emerging economies under different economic and political systems Recommended Graduate research and professional collections J S Uppal Choice Recent acceleration of the Indian economic growth rate from 6 to 8 per cent has sparked worldwide speculation that India is about to catch up with China and become another Asian miracle economy Economic Reform in China and India examines this prospect reviewing the development strategies pursued by the two countries over the last 50 years in general and exploring recently introduced reform measures in particular The culmination of many years of research by specialists in these economies this book assesses the performance of China and India at both macro and sectoral levels including economic social political and environmental aspects It illustrates the reasons why China has outperformed India in the past and identifies the obstacles that India will face in its attempts to catch up with China Providing solutions for China and India that can be applied to other developing countries this book will be invaluable for researchers academics and students focussing on economic development and Asian studies It will also receive much attention from investors and government analysts interested in the strategic implications of the emergence of the two Asian economic giants *Japan's New Economy* Magnus Blomström, Byron Gangnes, Sumner La Croix, 2001-01-25 Japan's economy stumbled in the 1990s After four decades of rapid growth that transformed Japan into a wealthy country at the world's technological frontier the last decade brought prolonged economic stagnation The rapid run up in asset prices in the late 1980s followed by their collapse in the early 1990s left a debt overhang that paralyzed the banking sector Policy reforms were initially half hearted and businesses were slow to restructure as the global economy changed The lagging economy has seemed impervious to aggressive fiscal stimulus measures and is still plagued by ongoing price deflation Japan's struggle has called into question the ability of the country's economic institutions originally designed to support factor accumulation and rapid development to adapt to the new economic environment of the 21st century Yet Japan's economy is already changing Driven by an aging population rapid technological change and increasing global competition the country's public and private institutions are being slowly reshaped This volume explores the forces that will drive structural and institutional change in three areas over the next decade the macroeconomy the organization of industry and the global economic and political environment Economists demographers and Japan specialists examine key aspects of the economy that will be transformed in coming years including population and savings the public pension system labor markets financial reforms deregulation of service industries productivity performance foreign investment trade and the impact of an emerging China The volume fills an important gap in the existing economic literature While much has been written about Japan's pre 1990s institutions and economic performance this volume is unique in its forward looking orientation trying to understand not only the institutional and structural changes that have already reshaped Japan in the 1990s but to identify the critical trends and institutional changes that will mould Japan's new economy over the next decade Greater China and Japan Robert Taylor, 2013-02-01 Contemporary relations between Greater China and Japan have been conditioned both by differing responses to the impact of

Western colonialism during the mid nineteenth century and the legacy of the Cold War There are mutual suspicions the Chinese fear of a Japanese military revival and the Japanese concern over increasing Chinese economic competition and territorial ambitions Robert Taylor recognises the mistrust in Sino Japanese relations but also sees shared advantages in this traditionally adversarial relationship The Chinese are currently modelling their economic strategy on Japan s developmental experience even though China s policies and institutions have distinctive features and differing agendas The study also examines the growing momentum towards sub regional integration rivalry between Greater China and Japan is giving way to competition between regional economic blocks and corporate entities Greater China and Japan explores the ambiguous relationship between the two countries and states that its development is crucial to the future of the region in the twenty first century
