Fondements Et Limites Du Capitalisme:

Fondements et limites du capitalisme Louis Gill, 1996 **The Political Economy of Bilateral Aid** Peter Blunt, 2022-12-23 The social and economic consequences of the COVID 19 pandemic and of extreme climate events have brought into sharp relief the serious deficiencies of our political economies The dominant global ideology of neoliberalism and its architects and beneficiaries are responsible for this Bilateral development assistance is an integral part of the neoliberal grand design However while the deficiencies of neoliberalism have been starkly exposed by the pandemic its collapse is unlikely in the short term Much bilateral assistance will therefore continue to be self serving Within these confines and on the basis of a sharply critical analysis of the functioning of technical assistance at the point of the design and delivery of programmes and projects this book identifies crucial supply side nodes of power and influence where feasible and relatively straight forward functional reforms strategy structure selection training would make genuinely developmental results for recipients more likely and enhance donor interests at the same time It argues that more authentic empathetic and altruistic technical assistance will be essential to bringing this about The arguments are supported by primary published evidence gathered by the author during 18 years of full time employment as a team leader or programme manager of technical assistance programmes The book will be of interest to students of development management development economics political economy and international relations as well as policy makers development practitioners and supply and demand side government officials Finance Capital Today François Chesnais, 2016-09-07 Finance Capital Today is shortlisted for the The Isaac and Tamara Deutscher Memorial Prize 2017 Finance Capital Today presents a rich new analysis of the specific features of contemporary capitalism notably its truly global nature and its financialisation calling on Marxist analyses of the concentration centralisation and globalisation of capital and Marx's theory of interest bearing and fictitious capital Chesnais shows how financial globalisation and the exponential growth of financial assets have developed alongside the globalisation of productive capital paying special attention to the contemporary operations of transnational corporations and global oligopoly He argues that the macroeconomic perspective is one in which large amounts of capital are looking for profitable investment in a setting of underlying overproduction and low profits The outcome will be low global growth repeated financial shocks and the growing interconnection between the environmental and economic crises Analyse économique et historique des sociétés contemporaines Marc Montoussé, 2007 Marx et le capitalisme Bernard Chavance, 2009-11-12 la fin du XXe siècle la théorie du capitalisme de Marx semblait dans les oubliettes de l'histoire La chute des systèmes socialistes et l'hégémonie de la doctrine absolutiste du marché semblaient enterrer définitivement une conception jugée dépassée dont les prédictions sur la fin prochaine du capitalisme avaient traversé l'histoire La grande crise économique mondiale du début du XXIe siècle ravive la vision critique que Marx avait élaboré celle d'un mode de production capitaliste contradictoire dont le développement s'effectue travers des convulsions périodiques au coût social considérable Cet

present day This study differs from other multidisciplinary analyses of this community principally because it studies the historical continuity of the dynamic of autonomy that has evolved since the beginning of Acadia The research for this complete chronological framework encompasses a number of intersecting disciplinary approaches at the historical political socio cultural and existential levels These differing perspectives are harmonized by their common objective of defining the process of autonomization and the counter process of heteronomization which lie at the heart of each of the periods studied These approaches allow critical openings between the framework of social history power relationships and the fundamental aspirations of the minority HCI International 2014 - Posters' Extended Abstracts Constantine Stephanidis,2014-05-19

Informatique et capitalisme Daniel Furjot, Manuel Janco, 1972-01-01 T00:00:00+01:00 Dans la situation concrète actuelle la question de l'informatique se présente sous une forme contradictoire qui en fait le lieu théorique de toutes les confusions D'une part un discours surabondant sur valorisant plein de complaisance véritable sous-produit culturel de la littérature humaniste D'autre part le mutisme résolu d'une gauche révolutionnaire qui a choisi de se taire craignant que le contre-discours ne constitue qu'une mystification au second degré Les auteurs veulent au contraire par leur travail contribuer au débat sur un problème important que les marxistes léninistes ont mené pour leur propre compte des fins militantes
