Smart Foods for ADHD and Brain Health Rachel Gow,2021-02-18 Changing one s diet not only improves physical health but benefits mood behaviour and cognitive function at a fundamental level This book highlights the link between nutrition and mental health and demonstrates the crucial role of diet in supporting individuals with ADHD Written by an internationally recognised leader in the growing field of nutritional psychiatry Dr Rachel Gow takes a nutrition based look at ADHD and its management Combining the latest research with the inspirational stories of a range of professionals and individuals whose lives have been touched by the issues raised this book also includes accessible tips throughout and a chapter of recipes to promote brain health This is an essential guide to understanding the interplay of brain health and nutrition and supporting families to build a diet that optimises brain function and health Handbook of Climate Change Across the Food Supply Chain Walter Leal Filho,Ilija Djekic,Sergiy Smetana,Marina Kovaleva,2022-04-22 This book presents climate change as a global phenomenon which affects the entire food chain Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change Most of them associate primary production with emission of greenhouse gasses identified as one of the causes resulting in warming the atmosphere and global climate effects A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline This

approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change. On the other side, temperature changes and variations of precipitation patterns together with extreme weather events and water reduction are recognized as predictors for producing less food, decreased food quality, new food safety risks, biodiversity losses, and depletion of resources associated with food production in modified circumstances. Last but not least, these effects introduce new threats known as food security, where some assumptions stress that almost one billion of people are hungry, not receiving enough food as a result of climate changes. As a result, the UN highlights the need for combating climate change and promotes sustainable food consumption and production. Based on the perceived need to promote and disseminate information on climate change related to food system, the Handbook of Climate change across the food supply chain is being produced. The publication compiles information, experiences, practical initiatives, and projects around the subject matter and makes it available to a wide audience. It is expected that the Handbook of Climate change across the food supply chain makes many benefits of climate service clearer and inter alia leads to an increase in the demand for such important services.

Nutritional and Health Aspects of Food in Western Africa Ogugua Charles Aworh, Patricia Gyaa Owusu-Darko, 2024-07-10. Nutritional and Health Aspects of Native West African Foods is part of an ongoing series that continues to build out Elsevier's Nutritional and Health Aspects of Traditional and Ethnic Foods series. Written by a gender diverse team of experts, this book explores native and wild West African foods from Cameroon, Ghana, and Nigeria where 60% of West Africa live. Through valorization trials, the book analyzes nutritional components and the processing and safety of native plants and botanicals and shows how indigenous foods such as grains, fruits, tubers, fungi, and cheese make a global impact on diet-related health claims and disease. From handling and processing methods to regulatory issues and sustainable farming, this book presents a framework to discover the influence of historical eating habits on today's diets. Promotes global availability and insight into native West African foods available in Cameroon, Ghana, and Nigeria. Reviews the safety, processing, and health benefits of these foods. Explores both scientific and anecdotal diet-related health claims. Analyzes nutritional components of native plants through valorization trials for global market. Presents framework to determine if these foods meet local and international regulatory requirements and presents strategies to remedy non-compliance.

Climate change, biodiversity and nutrition nexus Food and Agriculture Organization of the United Nations, 2021-12-23. Humankind is facing a perfect storm of climate change, biodiversity loss, and multiple forms of malnutrition, stunting, wasting, micronutrient deficiencies, and obesity coexisting in the same country, community, household, and even individual. Challenges from each of these areas are well known and recognized, but what seems to be missing in many development and policy circles is a recognition that food is at the centre of all three of these issues. This paper

identifies entry points within agri food systems to improve biodiversity and diets two levers that can be used to enhance nutrition and optimize environmental sustainability while ensuring social equity especially of the most vulnerable people It also presents recommendations for concrete actions by key stakeholders governments academia civil society private sector and development partners to build resilient inclusive and sustainable agri food systems
